GREEN'S
NURSERY CO.
Rochester, N. Y.
"The Flower City"

Green's 1930 Catalog

QUALITY  SATISFACTION  SERVICE

CHARLES A. GREEN
Founder

for over half a century

It Pays to Buy Direct

CHARLES A. GREEN was the first nurseryman to sell direct to the planter on the cash with order basis. This method makes it possible for the HOME OWNER or ORCHARDIST to purchase direct from Green's the highest quality nursery stock at the lowest possible cost. It eliminates agents' commissions of thirty to forty per cent, the cost of carrying open accounts, making collections, and other unnecessary expenses that the purchaser has to pay in the end.

For over half a century we have been satisfying our customers by rigidly maintaining our policy of "What Is Not Good For Our Customers Is Not Good For Us."

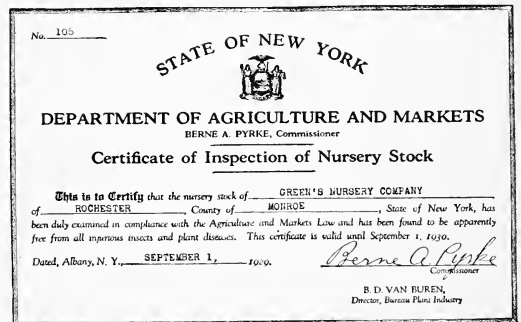

Green-Grown Products have made the old farm pay, established profitable orchards, have beautified and increased the value of large estates, city and rural homes. Green's method of selling direct to the planter has saved hundreds of thousands of people millions of dollars. We dedicate our 1930 CATALOG to those who have made our success possible.

Green-Grown Stock is Strong, Vigorous and Healthy, Ready to Grow and Give Complete Satisfaction

When you purchase from Green's you get hardy, northern grown stock, with fine tops and strong root systems, developed by thorough cultivation and fertilization while growing in our nurseries.

You take no risk when you order from us. We could not guarantee satisfaction without positive knowledge that our Trees, Plants and Vines were of the highest quality, ready to please the most particular customers.

Our success for over fifty years is your assurance of our reliability.

Green's Guarantee of Satisfaction

WE guarantee every Tree, Plant, or Vine sold by us to be strong, vigorous and healthy, and to deliver them to you in good condition. If for any reason you are not absolutely satisfied with your stock when it is received, advise us at once, and we will gladly replace the items or refund your money.

Green's Trees are True-to-Name—No human caution could be more exacting than ours. If any trees prove untrue to name, upon proper proof we will replace or refund the purchase price. Obviously, we cannot assume further responsibility than this.

Replacements—Our success depends on the success of our customers, therefore we do everything in our power to furnish them with vigorous, healthy stock that will grow and give complete satisfaction. It is just as impossible for us to guarantee the life of our growing things as it is for a doctor to guaran-

tee the life of a new born child. Like children, Trees, Plants and Vines cannot be expected to live without proper care and attention.

In the interest of our customers, however, we will, upon proper proof, replace at one-half price all stock that fails to grow, providing we are notified within ninety days after the planting of the stock. We reserve the right to have the stock returned which is to be replaced under this agreement. Effective January 1, 1930.

Important Information for Customers

Read Carefully Before Ordering to Avoid Mistakes

Green's Money Saving Terms Save You 1/3 to 1/2

Your remittance must be sent with order. An express money order, postal money order, or bank draft is the best form of remittance. You can send your personal check if you desire. It is not safe to send silver or bills, except in a registered letter. Green's low prices are F.O.B. shipping point, except where otherwise specified.

C. O. D. Shipments

To new customers, we extend the privilege of C.O.D. shipments, provided one-fourth cash is sent with order—balance to be paid to expressman, mailman or freight agent, when delivery is made.

Orders for Less Than Three Dollars

If your order amounts to less than three dollars, please add fifty cents extra for packing costs. In our endeavor to make our prices as low as possible, we have based our packing costs on orders amounting to ten dollars or more. As it costs practically as much to pack a small order as it does a large one, we find we cannot profitably handle orders for less than three dollars without an additional charge for packing.

When to Order

Send your order just as soon as you receive this catalog. It is decidedly to your advantage. It will enable us to reserve for you the varieties you want, and avoids the possibility of our being sold out. Then, too, you can save money by taking advantage of our cash discounts for early orders.

Date of Shipment Can Be Left to Us

We keep careful records, and receive daily reports, of weather conditions throughout the country and ship each order so as to reach our customers at the very best time for planting in their localities. If it is necessary that your order arrive on a certain date, please note it on your order sheet and we will ship to arrive as near that date as possible.

Plant New Varieties "Approved by Green's"

"Approved Varieties are Improved Varieties"

Each year hundreds of new varieties of growing things are introduced and bought by garden lovers of America. Some are good, hardy, and worthy of introduction, while others are not, and thousands of dollars are wasted annually by people who have no way of telling—which ones to buy.

With over half a century of experience with growing things, it is possible for us to determine which of the new introductions are worthy of planting. Before a new variety is "Approved by Green's," it is thoroughly tested, must prove perfectly hardy, and have outstanding characteristics in flower, taste, quality, habit of growth, and be superior to other varieties in its class, to prove worthy of our indorsement.

For over fifty years hundreds of thousands of people have bought with confidence, varieties offered in Green's catalog, because of our rigid policy of growing only the best and proven varieties of the highest quality.

New varieties approved by Green's marked * throughout our catalog.

Complete Planting Instructions Are Sent With Each Shipment

Our interest in you does not end when we receive your order. We want every customer to have complete success with growing things purchased from us. Our How To Plant booklet will be sent with your order. Should you desire these planting instructions before shipment, let us know, and we will gladly send them.

Cash Discounts for Early Orders

10%

Discount or an equal value in additional stock Free on CASH ORDERS amounting to \$5.00 or more received on or before March 20, 1930.

5%

Discount or an equal value in additional stock Free on CASH ORDERS amounting to \$5.00 or more received between March 21 and April 15, 1930.

Why we can make these liberal offers

Our huge volume of business each year has to be efficiently handled in a very short period in the spring. This means that our facilities are taxed to the limit. If we can induce our customers to send their orders early, it enables us to handle the thousands

of orders received with a much smaller office force. It also enables us to plan our spring work efficiently and more economically. This results in a considerable saving in our expenses, and we pass this saving on to you in the form of the above Cash Discounts.

Green's Ornamental Shrubs

All Blooming Size Ready for Immediate Effects

TRULY, "It's not a home until it's planted," and shrubs play the most important part in landscaping the home grounds. The gardens of old England and Italy were stiff and formal, using brick walls and trimmed hedges to afford seclusion. Americans have broken these traditions and our gardens have been created with natural beauty and loveliness by the use of graceful and colorful flowering shrubs. Green's shrubs have been very carefully selected and include the most beautiful and hardy varieties of new introductions and the lovely old ones we just can't do without. (Shrubs not over 2 to 3 ft. high can be sent by parcel post, postpaid, for 5c per shrub extra.)

Almonds (*Prunus glandulosa*)

Pink Flowering Almond (*Prunus glandulosa sinensis*). Beautiful double pink, rose-like flowers, early in spring before leaves appear. Grows 6 to 8 feet. **Price: 2 to 3 feet, 75c each.**

White Flowering Almond (*Prunus glandulosa albiplena*). Same as Pink Flowering Almond except

flowers are double white. **Price: 2 to 3 feet, 75c each.**

Altheas (*Rose of Sharon*) (*Hibiscus syriacus*). Beautiful bell-shaped flowers from August until frost. Hardy, erect, compact. Grows 8 to 10 feet high. We offer only double-flowered sorts in Pink, Purple, Red, White, Rose with darker center. Order by color. **Price: 2 to 3 feet, 50c each.**

ALTHEA—Rose of Sharon

*THE NEW BEAUTY BUSH—*Kolkwitzia Amabilis*
See Description Page 5

Ornamental Shrubs—Continued

Barberries (*Berberis*)

Japanese Dwarf Barberry (*Berberis thunbergii*). See page 30 for description.

Red-Leaved Japanese Dwarf Barberry (*Berberis thunbergii atropurpurea*). A new form of Japanese Barberry with brilliant red foliage and red berries that hang all winter. One of the newest shrubs, predicted by many as a variety of unusual merit. Green's have not as yet "Approved" it because its fine red color does not develop when planted in the shade. We recommend it for planting in sunny locations only. Grows to 3 feet. **Prices: 1 to 1½ feet, \$1.00 each; \$8.00 per 10.**

***Beauty Bush** (*Kolkwitzia amabilis*). A fountain of pink loveliness. One of the most hardy and beautiful shrubs China has ever given to the gardens of America. One of the choicest introductions of Dr. E. H. Wilson and the Arnold Arboretum. A shrub of year-round beauty, with graceful, spreading branches, covered with an amazing profusion of delicate pink flowers in early June. It grows 6 to 8 feet high and spreads 5 feet in width. By all means have one of these on your grounds. (See illustration page 4.) **Price: 1½ to 2 feet, \$1.50 each.**

Bush Honeysuckles (*Lonicera*)

Morrow's Honeysuckle (*Lonicera Morrowi*). A graceful, spreading type of honeysuckle, with fine, dark green leaves and creamy-white flowers. The blood-red berries which follow make it one of the most striking summer-fruiting shrubs. Grows 6 to 8 feet. **Price: 2 to 3 feet, 60c each.**

Pink Honeysuckle (*Lonicera tatarica rosea*). The favorite, old-fashioned shrub, covered with pink flowers in spring, immediately followed by scarlet berries that last through the fall. Grows more rapidly than any other shrub. Fine for screening out undesirable views, reaching an ultimate height of 8 to 10 feet very rapidly. **Prices: 2 to 3 feet, 50c each; \$4.50 per 10. 3 to 4 feet, 65c each; \$6.00 per 10.**

THE NEW RED-LEAVED JAPANESE DWARF BARBERRY

White Honeysuckle (*Lonicera tatarica alba*). Same as Pink Honeysuckle except its flowers are white. Combine both in your planting. **Prices: 2 to 3 feet, 50c ea.; \$4.50 per 10. 3 to 4 feet, 65c ea.; \$6.00 per 10.**

Butterfly Bush (*Buddleia*). A very attractive and unusual shrub. Its lavender flowers are very sweet-scented 6 to 10 inches long, resembling lilacs. Blooms from July until frost. The tops die back after blooming but grow annually to a height of 4 to 5 feet. **Price: strong 2 year plants, 50c each.**

HONEYSUCKLE—*Lonicera Tatarica Rosea*

BUTTERFLY BUSH—BUDDLEIA

Ornamental Shrubs—Continued

SLENDER DEUTZIA
Deutzia—Gracilis

Cutleaf Stephanandra (*Lacebush*) (*Stephanandra flexuosa*). A beautiful shrub which you should have. Feathery, fern-like foliage, green in summer, bronze red in autumn. Cream-colored flowers in June. Grows 4 to 5 feet high. **Price: 2 to 3 feet, 75c each.**

Deutzias

Double Rose Deutzia (*Deutzia crenata plena*). Full, double white, bell-shaped blossoms, tinged with rose in June. Grows 6 to 8 feet high. **Prices: 2 to 3 feet, 50c each; 3 to 4 feet, 65c each.**

Lemoine's Deutzia. Rather low growing, 3 to 5 feet high. Medium size, bell-shaped flowers of pure white. **Price: 2 to 3 feet, 75c each.**

Pride of Rochester Deutzia. An early variety that blooms in May. Bell-shaped flowers of pinkish white, with under side of the petals rose. Grows 6 to 8 feet high. **Prices: 2 to 3 feet, 50c each; 3 to 4 feet, 65c each.**

Slender Deutzia (*Deutzia gracilis*). A dwarf, dense-growing shrub, with single, white, bell-shaped flowers in May. Excellent for shrub borders in front of taller kinds. Grows 3 to 4 feet high. **Price: 1½ to 2 feet, 60c each.**

Snowflake Deutzia (*Deutzia candidissima*). Double white, bell-shaped flowers in June. Grows 6 to 8 feet high. **Price: 2 to 3 feet, 75c each.**

Dogwoods (*Cornus*)

Coral Dogwood (*Cornus sibirica alba*). Striking, bright coral red branches, very ornamental, especially for winter effects. Yellowish white flowers in spring, white berries in winter. Grows 6 to 10 feet high. **Price: 2 to 3 feet, 50c each.**

Goldtwig Dogwood (*Cornus stolonifera lutea*). A broad bush about 4 feet high, with strikingly conspicuous yellow bark. Very attractive. **Price: 2 to 3 feet, 50c each.**

Dogwood (*tree form*) described on page 13.

Golden Bells (*Forsythia*)

Border Forsythia (*Forsythia intermedia*). This beautiful old favorite is loved by all. One of the first shrubs to bloom in the spring, with bright yellow, bell-shaped flowers in April before the leaves appear. Grows erect 8 to 10 feet. **Prices: 2 to 3 feet, 50c each; 3 to 4 feet, 60c each.**

Weeping Forsythia (*Forsythia suspensa*). A magnificent drooping type, with long graceful branches bend-

ing to the ground. Flowers same as Border Forsythia. Grows 6 feet high. **Price: 2 to 3 feet, 75c each.**

Golden Elder (*Sambucus canadensis aurea*). An exceedingly attractive shrub, with golden yellow leaves and white flowers in May and June. Grows 10 to 12 feet high. Should be pruned frequently to intensify color of foliage. **Prices: 2 to 3 feet, 50c each; 3 to 4 feet, 65c each.**

Hydrangeas

Hydrangea Arborescens (*Grandiflora*) (*Hills of Snow*). Clusters of snow-white flowers from July through September, resembling the Old Fashioned Snowball. Grows naturally into a round, compact bush 4 to 5 feet high. Makes a fine hedge and grows well in shady places. **Price: 2 to 3 feet, 60c each.**

Hydrangea Paniculata Grandiflora (*bush form*). In our opinion, no other shrub gives quite the "value received" as this hardy hydrangea. Immense clusters of greenish-white flowers changing to white and later to delicate pink. Blooms in August and September, and if the flowers, are allowed to dry on the bush, they turn to a bronzy green and are valuable for winter decoration in the home. Makes a beautiful flowering hedge. Grows 6 to 7 feet high. **Prices: 2 to 3 feet, 50c each; \$4.00 per 10. 3 to 4 feet, 75c each; \$6.00 per 10.**

Hydrangea Paniculata Grandiflora (*tree form*). We train the bush hydrangea to single stems which form small, compact, miniature trees, much like the tree rose in appearance. Same characteristics as the bush form except shape. **Price: 3 to 4 feet, \$1.50 each.**

Indian Currant (*Coral Berry*) (*Symphoricarpos vulgaris*). A desirable shrub for shady places. Grows 3 to 5 feet tall, producing inconspicuous, rose-colored flowers in June and July. Its dull red, coral-like berries cling in great profusion along the under side of the branches. Fine as a hedge. Desirable for planting on banks to prevent soil washing away. **Prices: 2 to 3 feet, 50c each; 3 to 4 feet, 60c each.**

SEND YOUR ORDER EARLY—YOU SAVE 10%
(SEE PAGE 3)

HYDRANGEA—Arborescens

Ornamental Shrubs—Continued

Japan Quince (*Cydonia japonica*). Another old favorite. Fine for specimen or border planting. Completely covered with dazzling scarlet flowers in May. The fruits which follow are quince-shaped and quite fragrant. Armed with fine thorns, it makes not only a desirable flowering hedge, but a defensive one as well. Grows naturally 6 to 8 feet high, but can stand any amount of shearing. **Price: 2 to 3 feet, 75c each.**

Double Kerria (*Kerria japonica*). Produces an abundance of double flowers, rich yellow resembling half-opened rose buds. Its branches are of beautiful pea-green color. Grows 6 to 8 feet high. Should be planted in sheltered locations in the North. **Price: 2 to 3 feet, \$1.00 each.**

Mock Orange or Syringas (*Philadelphus*)

Golden Mock Orange (*Philadelphus aureus*). Shown on page 9. A compact, dwarf-growing shrub, with very brilliant yellow foliage and white flowers in May and June. Retains its color all season. Fine for planting under windows or low porches. Beautiful effects are obtained by grouping with Anthony Waterer Spiraea, with its purple flowers and fine green foliage. If double rows are desired, plant the Mock Orange in the background as it grows a little taller than the Spiraea. Grows 3 to 4 feet high. **Price: 1½ to 2 feet, 75c each.**

Large Flowered Mock Orange (*Philadelphus grandiflorus*). A large-spreading shrub, with graceful, drooping branches. Large, creamy-white flowers in May or June. Grows 8 to 10 feet high. **Prices: 2 to 3 feet, 50c each; 3 to 4 feet, 65c each.**

***Virginal Mock Orange** (*Philadelphus virginalis*). We consider this the most beautiful white flowering shrub introduced in the last quarter century. Exceeds all other Mock Orange in beauty and form; unusually large, double white flowers, often 1½ inches across, in clusters of five to seven in a group. Aside from its beauty of flower, its rich perfume, rivaled only by that of orange blossoms, makes it worthy of a place on your grounds. Blooms in June and continues over a long period. Grows compact to a height of 6 to 8 feet. **Price: 2 to 3 feet, \$1.00 each.**

New varieties approved by Green's marked *

***VIRGINAL MOCK
ORANGE**

GREEN'S FLOWERING SHRUB COLLECTION No. 1

10 Popular Shrubs that will give bloom from early spring until late fall. All 2 to 3 foot shrubs that will bloom this year.

1 Forsythia Intermedia	1 Mock Orange
1 Double Rose Deutzia	1 Snowberry
1 Pride of Rochester Deutzia	1 Spiraea Billardi
1 Honeysuckle (White)	1 Spiraea (Golden)
1 Lilac (Purple)	1 Wegelia (Pink)

Regular Price, \$5.10

Special Collection Price, \$3.98

NOTE: This collection can be sent by Parcel Post, postpaid, for \$4.28.

FOUNDATION PLANTING OF FLOWERING SHRUBS ABOUT YOUR HOME WILL ADD TO ITS BEAUTY AND INCREASE ITS VALUE

Ornamental Shrubs—Continued

LILACS (*Syringa*)

Common Purple (*Syringa vulgaris*). Far from common in beauty, very popular. The well known, old fashioned lilac. Fragrant, lilac-colored flowers in May. Grows 8 to 12 feet high. **Price: 2 to 3 feet, 60c each.**

Common White (*Syringa alba*). The popular white variety. Splendid panicles of pure white, single flowers in May. Fragrant. Grows 6 to 8 feet high. **Price: 2 to 3 feet, 60c each.**

Japanese Tree Lilac (*Syringa japonica*). A pyramidal tree-shaped lilac, often attaining a height of 30 feet. Beautiful for lawn specimens. Yellowish white flowers in great profusion in June and July. **Price: 2 to 3 feet, \$1.00 each.**

Late Lilac, Villosa (*Syringa villosa*). A bushy lilac, rarely over 6 feet high. Rosy pink flowers late in the spring. **Price: 2 to 3 feet, 75c each.**

Rouen Lilac (*Syringa Rothomagensis Var. rubra*). A distinct variety, with reddish flowers; panicles of great size and very abundant. The only variety that does well in shady locations. Fine for a hedge or border planting. **Prices: 2 to 3 feet, 75c each; \$6.50 per 10.**

HYBRID FRENCH LILACS

Green's "Approved Varieties"

Selected from the World Famous Highland Park Collection

RIGHT here in sight of our office is the largest single collection of Lilacs in the world. From nearly three hundred varieties we have selected ten of the choicest to offer our customers. Every one is worthy of a place on your grounds. Hybrid Lilacs are far superior to the common varieties; their flower clusters are larger and more fragrant. These extremely fine and unusual varieties, when offered, sell from \$1.50 to \$2.00 each. **Green's special price, 2 to 3 feet, \$1.10 each.**

Note: D indicates double flowers—S single flowers.

***Belle de Nancy** (D). Beautiful, large, satiny rose flowers, with white centers. Grows 6 to 8 feet high.

***Charles Joly** (D). Large, dense flower heads of very dark reddish purple. Grows 5 to 6 feet high.

***Charles X** (S). Large trusses of light lavender flowers with bluish tinge. Rapid grower. Grows 6 to 8 feet.

***Dr. Charles Jacob** (S). One of the unusual red flowered varieties. Grows 6 to 8 feet high.

***Jacques Calot** (S). Very large panicles of delicate rosy pink flowers. Grows 6 to 8 feet high.

***Madam Casimer Perier** (D). Medium sized clusters of deep white flowers. Grows 5 to 6 feet high.

***Miss Stepman** (S). Enormous trusses of large, perfectly shaped, pure white flowers with reflex lobes.

***President Grevy** (D). Immense clusters of double wisteria-violet flowers, the faces of which are a pretty contrasting shade of light blue. Grows 6 to 8 feet high.

***Rene Jarry Desloges** (D). Very large panicles of exquisite and unusual shade of blue flowers. Grows 6 to 8 feet high.

***Souvenir de Ludwig Spaeth** (S). Extremely long panicles of large, rich purple flowers. Grows 6 to 8 feet high.

THREE CHOICE HYBRID LILACS

Beautiful effects are obtained by grouping Lilacs and Forsythias together. The yellow flowers of the Forsythia, as illustrated below, lend a remarkably pleasing contrast to the various colors of Lilacs.

BORDER FORSYTHIA
Description page 6

Ornamental Shrubs—Continued

Pearl Bush (*Exochorda grandiflora*). Buds, like pearls strung on slender threads, opening up to fragrant clusters of pure white, starry flowers. Grows 6 to 10 feet high. **Price: 2 to 3 feet, 75c each.**

Snowberry (*Symphoricarpos racemosus*). See illustration on page 10. A slender, medium-growing shrub, which does well in any soil and will flourish under trees and in dense shaded places where little else will grow. Leaves are dark green and slender, small rose-colored flowers in June and July. Clusters of attractive, milk-white berries which last until late in winter. Very attractive as a hedge. Grows 3 to 5 feet high. **Prices: 2 to 3 feet, 50c each; 3 to 4 feet, 60c each.**

Spiraeas

Anthony Waterer Spiraea. A dwarf variety, growing 2 to 3 feet high, branches of which terminate with beautiful, deep rose flowers that are fine for bouquets. If first blooms are cut, it will continue to bloom all summer. Very desirable for grouping with Golden Mock Orange beneath window or in front of taller growing shrubs. Pretty green foliage. **Price: 1½ to 2 feet, 60c each.** (See illustration below.)

Billard's Spiraea (*S. Billardi*). An erect growing shrub, with dense spikes of rose-pink flowers 4 to 6 inches long in July and August, and again in the fall. Does well in moist places. Grows 4 to 6 feet high. **Prices: 2 to 3 feet, 50c each; 3 to 4 feet, 60c each.**

Fortune's Spiraea (*S. Fortunei*). A beautiful, upright shrub, 4 to 5 feet high. Deep pink flowers from June to September in large, flat clusters. Foliage opens up a pretty purplish color and turns to a deep green. **Price: 2 to 3 feet, 60c each.**

Froebel's Spiraea (*S. Froebeli*). A new variety, called by some the Improved Anthony Waterer. Its flowers and foliage are identical, but it grows taller—4 to 5 feet. Groups well with Golden Mock Orange and Slender Deutzia, but when planted with these it should be placed in the background. **Price: 2 to 3 feet, 60c each.**

Golden Spiraea (*S. opulifolius aurens*) (*Ninebark*). A rapid-growing variety, with masses of snowy white flowers in June. Young foliage bright yellow, changing to golden brown in autumn. Very desirable for group plantings. Grows 8 to 10 feet high. **Prices: 2 to 3 feet, 50c each; 3 to 4 feet, 60c each.**

***Korean Spiraea** (*S. trichocarpa*). Another new shrub from China introduced by Dr. E. H. Wilson and the Arnold Arboretum. Bold masses of snowy white flowers in June. Retains its glossy green foliage all summer. An excellent and graceful variety, growing 4 to 6 feet. Similar to the popular Van Houttei but far more desirable. Very hardy. **Price: 1 to 1½ feet, \$1.50 each.**

Thunberg's Spiraea (*S. thunbergi*). A graceful bush, whose thread-like branches bear innumerable small white flowers and tiny leaves. Foliage changes in autumn to bright red and orange. Grows 3 to 5 feet high. **Price: 2 to 3 feet, 75c each.**

Ornamental Shrubs—Continued

Spiraeas—Continued

VanHoutte Spiraea—Better known and more largely planted than any other shrub. An extremely graceful shrub, with long, drooping branches completely covered with flat clusters of white flowers in May and June. When in blossom, a hedge of Spiraea Vanhoutte is a sight long to be remembered. Cannot be too highly recommended. We consider it the best for general purposes. Grows 6 to 8 feet high. **Prices: 2 to 3 feet, 50c each; 3 to 4 feet, 65c each.**

Sweet Shrub (*Allspice*) (*Calycanthus floridus*). An unusual upright-growing shrub, with reddish brown shoots and spicy, fragrant, chocolate-colored flowers in June. Grows 5 to 6 feet high. **Price: 2 to 3 feet, \$1.00 each.**

Viburnums

Consist of a family of shrubs which give year around beauty. Growing in popularity fast and recently called double purpose shrubs. Aside from beauty of flowers, their foliage colors gorgeously in the fall and many have colored berries that remain all winter. Be sure to include them in your plantings.

Arrow-Wood (*V. dentatum*). White flowers in May ripen into black berries of which the birds are fond. Foliage turns deep purple and red in autumn. Does well in moist places. Grows 10 to 12 feet high. **Price: 2 to 3 feet, 75c each.**

***Fragrant Viburnum** (*V. carlesi*). A very distinct, new and rare variety. A low-spreading, hardy shrub, with extremely fragrant white flowers tinged with pink, resembling apple blossoms, appearing in May and June. Flowers open slowly, giving long blooming period. Unquestionably one of the most valuable new shrubs. Grows 4 to 5 feet high. **Price: 1½ to 2 feet, \$2.00 each.**

High Bush Cranberry (*V. opulus*). An upright and spreading shrub; smooth, light grey branches; broad leaves that turn a beautiful scarlet in fall. Flat heads of white flowers in May and June, followed by scarlet berries which remain and keep their bright color until the following spring. Grows 8 to 10 feet high. **Price: 2 to 3 feet, \$1.00 each.**

**It Pays to Buy
Direct
from Green's**

SNOWBERRY
Symphoricarpos Racemosus

Japanese Snowball (*V. tomentosa plicatum*). An erect, compact shrub, 6 to 8 feet tall, with purple-tinged foliage. Ball-shaped clusters of white flowers in June. **Price: 2 to 3 feet, \$1.00 each.**

Old Fashioned Snowball (*Common Snowball*) (*V. opulus sterile*). A well-known, favorite shrub, with globular clusters of white flowers the latter part of May. Grows 8 to 10 feet high. **Price: 2 to 3 feet, 75c each.**

Witherod (*V. cassinoides*). Creamy white flowers from June to July, followed by clusters of pink berries that change to blue. Autumn foliage vinous red. Does well in moist places. Grows 6 to 8 feet high. **Price: 2 to 3 feet, \$1.00 each.**

**Cash Discounts for
Early Orders**

A FOUNDATION PLANTING OF THE POPULAR SPIRAEA VAN HOUTTE

Ornamental Shrubs—Continued

Weigelas (*Diervilla*)

Candida Weigela. Ivory-white flowers on graceful arching branches in June. Grows 4 to 6 feet high. **Price: 2 to 3 feet, 75c each.**

Eva Rathke Weigela. A fine dark red variety of dwarf habit. Blooms profusely in June and intermittently all summer. Grows 3 to 5 feet high. **Price: 2 to 3 feet, 75c each.**

Pink Weigela (*Weigela Rosea*). Deep pink flowers in great profusion in June. Grows 6 to 8 feet high. **Price: 2 to 3 feet, 50c each.**

Winged Burning Bush (*Euonymus alatus*). Spreading in growth, with peculiar corky bark. Has ornamental scarlet berries. Foliage turns a beautiful crimson in autumn. Ultimate height 6 feet. **Price: 2 to 3 feet, \$1.25 each.**

How to Plant and Care for Shrubs

Planting Flowering Shrubs

When planting out shrubs, dig your holes large enough to allow the entire root system to be placed in the hole without bending the roots. Square holes are better than round holes.

Be sure to pack the earth tightly about the roots and when the hole is half filled with earth, fill the remainder with water and allow it to settle before filling the remainder of the hole with earth. This will also help to settle the earth about the roots, which is vitally important to the success in transplanting all growing things. The proper spacing of the shrubs naturally depends on its ultimate growth. The following table will guide you:

Plant varieties growing:

3 to 4 feet in height $2\frac{1}{2}$ to 3 feet apart

4 to 6 feet in height 3 to $3\frac{1}{2}$ feet apart

6 to 8 feet in height $3\frac{1}{2}$ to 4 feet apart

8 to 10 feet in height 4 to $4\frac{1}{2}$ feet apart

You will find the ultimate height of each variety given in the description of the shrub.

The above illustration shows the proper arrangement for shrubs set in a double row. The shrubs should be staggered as indicated.

Pruning Flowering Shrubs

While shrubs do not need severe pruning, too many people neglect their shrubs in this respect and therefore do not get their full beauty. Annual pruning will make your shrubs flower better and become more bushy. Each year the tops should be cut back at least 6 to 12 inches. Never cut the tops straight across. Cut back the tops to give a semi-circle appearance. This means that the outer top branches should be cut back farther than the center ones. Annual pruning forces out new growth and more flowers. To keep shrubs at any desired height, prune back farther. It will not harm your shrubs.

Fig. A

Fig. B

Illustration A shows shrubs as received. Illustration B shows the shrubs properly pruned, ready for planting.

Proper Time to Prune

We believe that this important knowledge is responsible for people neglecting their shrubs because if pruning is not done at the proper time the shrubs will not bloom. With rare exceptions shrubs that bloom before July 1st the flowers come on the last season's growth. Shrubs that bloom after July 1st the flowers come on the new growth made early in the same season. Therefore, prune as follows:

Shrubs flowering before July 1st prune immediately after flowering.

Shrubs flowering after July 1st prune in late fall or early spring.

Most shrubs having berries in the fall flower after July 1st. If berry-laden shrubs flower before this date they should be pruned in late fall or early spring.

Note: Lilacs do not require pruning other than cutting off the seeds left after flowers have gone. This is particularly true with French varieties. Common varieties will stand additional pruning if desired to curtail growth.

You will not harm the bushes by cutting the flowers when in bloom. Never break the stems of the flowers, cut them with knife or shears.

OUR LANDSCAPE ARCHITECTS ARE READY TO SERVE YOU

Green's Landscape Department is maintained in the interest of our customers and we are ready at all times to help you solve your home planting problems. Please feel perfectly free to call upon us for advice.

EVERY CUSTOMER OF OURS MUST BE COMPLETELY SATISFIED

Our customers continue to buy from us year after year and recommend Green's Nursery Company to their friends. There must be a reason—read Green's Guarantee of Satisfaction on page 2. Send your order early and save money—see Liberal Cash Discounts offered on page 3.

Green's Ornamental Vines

Will Add a Certain Charm not Obtainable from any other Source

THE home planting is not complete without them. They keep the house cool in summer and furnish protection and shade for the porch, arbor or pergola. Many beautiful flowering vines will be found in our complete assortment. Include them in your plantings.

American Ivy (*Virginia Creeper*) (*Woodbine*) (*Ampelopsis quinquefolia*). The well-known native ivy, with five-parted leaves that change to scarlet in fall. Blue-black berries. Hardy and quick-growing. Requires artificial support on walls. **Price: 2 year vines, 50c each; \$4.50 per 10.**

Bittersweet (*Celastrus scandens*). This vine produces the colorful clusters of orange and crimson berries so popular and attractive for winter home decoration. Why tramp miles or pay high prices for them when two vines will give supply for yourself and friends. Practical for any place a climbing vine is desired. For pollination, we recommend two vines. **Price: 2 year vines, 60c each, 2 for \$1.00; 10 for \$4.50.**

Boston Ivy (*Japan Ivy*) (*Ampelopsis veitchii*). It is a rapid grower and clings to brick or stone walls without artificial fastening. The foliage is handsome, dark green in summer, changing to crimson and yellow in autumn. It is a little tender while young, and requires protection the first winter, but once established there is no further risk. **Price: 2 year vines, 75c each; \$7.00 per 10.**

Bittersweet

Clematis Jackmani

Clematis Jackmani. A large-flowering variety, the flowers often 4 to 6 inches in diameter. Intense, violet-purple, rich velvety appearance. It blooms continually from July until frost. **Price: 2 year vines, \$1.00 each; \$9.00 per 10.**

Clematis Paniculata. A rapid-growing vine, with handsome, clear, glossy foliage and medium sized, star-shaped, fragrant, white flowers in September when few other vines are in blossom. Very attractive. **Price: 2 year vines, 50c each; \$4.50 per 10.**

Dutchman's Pipe (*Aristolochia siphon*). A very rapid-growing vine, which on account of its large, heart-shaped leaves is desirable when dense shade is required. Obtains its name from its peculiar brownish flowers, resembling in shape a miniature pipe. **Price: 2 year vines, \$1.00 each; \$9.00 per 10.**

Hall's Japan Honeysuckle (*Lonicera japonica hallicana*). One of the most popular of climbing vines, which in addition to its ordinary uses as a climber is valuable for covering banks, bare spaces, etc., where grass will not grow. Flowers white, changing to yellow, fragrant and in bloom the whole season. **Price: 2 year vines, 50c each; \$4.50 per 10.**

Trumpet Vine (*Bignonia radicans*). A grand old favorite. Showy, orange-scarlet flowers and evergreen leaves. A strong grower, often over 30 feet tall. Fine for training on walls, trellises, trunks of trees and arbors. **Price: 2 year vines, 50c each; \$4.50 per 10.**

Wisteria (Purple). Desirable for heavy trellises and pergolas. Attractive if trained to old trees. Pea-shaped, purple flowers in dense, pendent clusters, often a foot long. Blooms in May. Wisterias grown from seed or cuttings are often tardy in blooming. We sell only grafted vines which assure early flowering. **Price: 2 year vines, 85c each; \$8.00 per 10.**

Wisteria (White). A white-flowering form of the Purple Wisteria. Same as above except in color of blossom. **Price: 2 year vines, 85c each; \$8.00 per 10.**

Green's Ornamental Trees

Will Add Value and Beauty to Your Property

WHAT a barren place this world would be without our beautiful shade trees. You owe the future generation a debt which the past generation has created and you have enjoyed, that of our full-grown trees. The most attractive homes are those with a few well placed ornamental trees around them. There is a growing appreciation of trees. More people are learning to know and love them. Shade trees around the farm or city home will not only add to its beauty and comfort, but will greatly increase its value.

Ash, American Mountain (*Sorbus Americana*). A handsome, little lawn tree, growing 20 to 30 feet high, with long, dark green foliage and clusters of bright red berries. **Prices:** 4 to 5 feet, \$1.00 each; 5 to 6 feet, \$1.25 each; 6 to 8 feet, \$1.75 each.

Birch (*Betula*)

European (*Betula Alba*). Attractive, smooth white bark and handsome foliage. Very hardy. Grows 50 to 60 feet high. **Price:** 6 to 8 feet, \$2.25 each.

Cut-Leaved Weeping, White (*B. laciniata pendula*). A tall, graceful, weeping tree, with silvery-white bark and delicately cut foliage. Excellent for lawn and cemetery planting. Reaches 60 feet at maturity. **Price:** 5 to 6 feet, \$3.00 each.

Catalpa

Bungei (*Umbrella Catalpa*). A beautiful, umbrella-shaped tree, with large, heart-shaped leaves laid with shingle-like precision, forming an even, compact, dome-shaped head; hardy, unique and handsome; very useful in formal plantings. Grows about 8 feet tall. This is a grafted variety of catalpa, and while the top of the tree becomes larger and more compact each year, the trees do not grow any taller. **Prices:** 5 to 6 feet, \$2.00 each; 6 to 8 feet, \$2.50 each.

Western (*Catalpa speciosa*). One of the most showy flowering trees, noted for its fast and vigorous growth. Large, heart-shaped leaves, white flowers tinged with violet and dotted with purple and yellow. Its long, narrow "beans" in autumn are unique. Grows to a height of 60 feet. Very hardy. **Prices:** 5 to 6 feet, 50c each; 10 for \$4.50. 6 to 8 feet, \$1.00 each; 10 for \$9.00.

Chinese Angelica Tree (*Aralia japonica*). Unusual. Small tree, with large tropical palm-shaped leaves borne on long stems that drop each fall. Broad panicles of white flowers in July. Grows 20 feet high. **Price:** 5 to 6 feet, \$1.25 each.

Crab, Bechtel's (*Pyrus ioensis bechteli*). A handsome bush or little tree, seldom over 20 feet in height. One of the finest for lawn decoration. Produces in profusion double, delicate pink flowers resembling at a distance dainty little roses. Is very fragrant. **Prices:** 2 to 3 feet, \$1.00 each; 3 to 4 feet, \$1.25 each.

Dogwoods (*Cornus*)

Red Flowering (*C. florida rubra*). A dwarf tree, with beautiful, large light red flowers appearing early in the spring before the grayish-green leaves, and followed by attractive red berries. Leaves turn to deep red in autumn. Grows 10 to 20 feet high. **Price:** 2 to 3 feet, \$3.50 each.

White Flowering (*C. florida alba*). Same as Red except flowers are white. **Price:** 2 to 3 feet, \$1.25 each.

Dogwood (*Shrub Form*) see page 6.

BECHTEL'S CRAB

BIRCH—European (*Betula Alba*)

Ornamental Trees—Continued

Elms (*Ulmus*)

American (*U. Americana*). In our opinion, the most handsome and dignified of all the native trees. A tall-growing, stately tree, reaching 60 feet, with a wide, arching top and vase-like form. Extensively used for street planting, where its wide-sweeping branches form perfect Gothic arches over the streets. **Prices: 6 to 8 feet, \$1.50 each; 8 to 10 feet, \$2.00 each.**

***Chinese** (*U. pumila*). A new introduction from China. This variety is a very rapid grower. Known to have reached a height of 20 feet six years after planting an 8 to 10 foot tree. Resembles the popular Norway Maple in shape. Good foliage, more dense than other elms. Exceptionally adapted for street and shade planting where quick results are desired. Grows 75 feet high. **Prices: 6 to 8 feet, \$2.50 each; 8 to 10 feet, \$3.75 each.**

***Moline** (*U. Moline*). Another new elm, compact but a fast grower. Leaves of distinct dark blue-green color. Grows 60 feet high. **Prices: 6 to 8 feet, \$2.00 each; 8 to 10 feet, \$2.50 each.**

European Spindle Tree (*Euonymus Europaeus*). Covered with bright yellow flowers in spring, followed by brilliant, rose-colored berries. Grows 15 feet high. **Price: 4 to 5 feet, \$1.25 each.**

Horse Chestnut, White (*Aesculus hippocastanum*). A large tree of regular outline, 60 to 80 feet tall, completely covered in May with great, upright spikes of white flowers. Satisfactory either as a street or lawn tree, particularly desirable where dense shade is required. **Prices: 4 to 5 feet, \$1.25 each; 5 to 6 feet, \$1.50 each; 6 to 8 feet, \$2.00 each.**

Japanese Flowering Cherry (*Cerasus Fugenzo*). Sometimes called James H. Veitch. This is the finest of all Japanese Flowering Cherries. A mass of large pink or rose colored flowers, clinging closely to the branches. The tree appears to be buried beneath a

wealth of exquisite color and fragrance. Grows 20 feet and upwards. **Price: 3 to 4 feet, \$3.00 each.**

Linden, American (*Basswood*) (*Tilia Americana*). A tall-growing, stately tree, growing 60 to 80 feet tall, with large, shining, green leaves and light yellow, fragrant flowers in July. A splendid tree for lawn or street planting. Valuable for its beautiful white wood. **Price: 6 to 8 feet, \$2.25 each.**

Maples (*Acer*)

Ash-Leaved (*Box Elder*) (*A. negundo*). A very hardy, fast-growing tree about 60 feet high, planted extensively in the West for timber and windbreaks because it endures both drought and cold unusually well. Easily distinguished by its greenish-yellow bark. Bright green leaves which turn to yellow in autumn. **Prices: 6 to 8 feet, \$1.00 each; 8 to 10 feet, \$1.25 each.**

Norway (*A. platanoides*). Without a doubt one of the most desirable shade trees for street and lawn planting. Of fairly rapid growth, reaching a height of 60 feet at maturity. Sturdy, compact and vigorous, forming a rounded head of stout branches and broad, deep green leaves. **Prices: 6 to 8 feet, \$2.25 each; 8 to 10 feet, \$3.00 each; 10 to 12 feet, \$5.00 each.**

Silver (*Soft Maple*) (*A. dasycarpum*). The fastest growing of the maples, very valuable where immediate shade is required. Grows to a height of 60 feet, forming a large, spreading head, with bright green leaves, silvery white on the under side. Does equally well in well-drained or low, swampy locations. **Prices: 6 to 8 feet, \$1.25 each; 8 to 10 feet, \$1.75 each.**

Sugar (*Hard or Rock Maple*) (*A. saccharum*). A tree of magnificent proportions, often 80 feet in height, straight, spreading and symmetrical in shape. Long-lived. Dark green leaves, turning to scarlet and gold in autumn. **Prices: 6 to 8 feet, \$2.50 each; 8 to 10 feet, \$3.75 each.**

ELM—American

SILVER MAPLE

Ornamental Trees—Continued

Mulberries

New American. For description see page 47.

Russian (*Morus alba tartarica*). A very hardy, low-growing tree, 20 to 30 feet high, with beautifully cut foliage and an abundance of fruit which attracts the birds. Not one of the edible varieties. **Prices:** 5 to 6 feet, 75c each; 6 to 8 feet, \$1.00 each.

Tea's Weeping. Forms a perfect umbrella-shaped head with long slender, willow branches drooping to the ground. It is very hardy and easy to transplant. **Price:** 5 to 6 feet, \$3.00.

❖
Oak, English (*Quercus robur*). The Royal Oak of England. A spreading, long-lived tree, 40 feet or more at maturity, with dark green leaves, smaller than those of our native species. Well adapted for lawn and public grounds. **Price:** 5 to 6 feet, \$2.50 each.

Plane, Oriental (*European Sycamore*) (*Platanus orientalis*). A hardy, rapid-growing shade tree that does well in smoky cities, near the seashore, or in other unfavorable situations. Excellent for street planting. Beautiful foliage. Grows 60 feet and upwards. **Price:** 8 to 10 feet, \$2.25 each.

Poplars (*Populus*)

Carolina (*Southern Cottonwood*). A very rapid-growing tree, giving shade in a very short time. Very easy to transplant. Desirable for planting for the protection of the banks. Attains a height of 60 feet at maturity. **Prices:** 6 to 8 feet, 50c each; 10 for \$4.00. 8 to 10 feet, 75c each; 10 for \$6.00.

Lombardy. A tall, narrow, tapering tree, 60 feet high at maturity, a striking feature in any landscape. Fine for planting in groups, along driveways, or to make boundary lines. Good for tall screen hedges. **Prices:** 5 to 6 feet, 60c each; 10 for \$5.00. 6 to 8 feet, 85c each; 10 for \$7.50. 8 to 10 feet, \$1.25 each; 10 for \$10.00.

NORWAY MAPLE

Plums (*Flowering*)

Double Flowered (*Prunus triloba*). The most beautiful of all flowering plums. A gorgeous mass of very double, pink blossoms early in the spring before the leaves appear. A fine, small tree for lawn planting. Grows 10 to 12 feet high. **Prices:** 2 to 3 feet, \$1.25 each; 3 to 4 feet, \$1.50 each.

Purple-Leaved (*Prunus pissardi*). A handsome, showy little tree, 20 feet in height, with striking, pinkish-purple leaves in the spring that deepen in color as the season advances. Small, white, single flowers. Very striking and ornamental for lawn planting. **Prices:** 3 to 4 feet, \$1.00 each; 4 to 5 feet, \$1.25 each.

Thorns (*Hawthorn*)

Double White (*Crataegus oxyacantha flora plena*). The famous May Thorn of England. Low, dense, little tree about 20 feet in height. A mass of clustered, double rose-shaped, white flowers in May, followed by a display of showy, scarlet fruits which remain a long time. Makes a beautiful flowering hedge or specimen. **Price:** 3 to 4 feet, \$2.25 each.

Paul's Scarlet (*Crataegus oxyacantha Pauli*). Similar to White Flowering Thorn except that the flowers are a deep crimson scarlet. Grows 10 to 12 feet high. **Price:** 3 to 4 feet, \$2.25 each.

Willows (*Salix*)

Babylon, Weeping. Our well-known weeping willow. A large, graceful tree, especially effective when planted near water. Grows 30 to 60 feet high. **Price:** 6 to 8 feet, \$1.25 each.

Golden (*Tree Form*). A very showy, yellow-barked tree, reaching a height of 60 feet at maturity. A handsome tree at all seasons, but particularly conspicuous in winter and early spring before the leaves appear. **Price:** 6 to 8 feet, 75c each.

Golden (*Bush Form*). 4 to 5 feet, 50c each.

ORIENTAL PLANE TREES

Green's Selected Perennials

Planted This Spring Will Provide Glorious Flowers in Your Garden This Summer

By a careful selection of varieties, you can have a constant supply of flowers for table and house decoration. They can be planted almost anywhere, in beds and borders by themselves, as a foreground for your shrubby plantings, in your rockery, and of course are indispensable in the formal garden. To be most effective, several plants of one variety or color should be massed together, never plant less than three of a variety or color in a clump; to plant them singly is indeed a mistake.

Prices of All Perennials, Unless Otherwise Noted, Strong, Field-Grown Plants, 35c each, 3 for 90c, 10 for \$2.50, postpaid. We make separate shipments of perennials.

Anchusa Dropmore (Alkanet). One of the best hardy perennials. Grows from 3 to 5 feet high. Bears in abundance, flowers of the richest gentian-blue during May and June.

Anemone (Japanese Windflower). These beautiful flowers are among the most important hardy plants. While they begin blooming in August they are more especially valuable on account of their continuing in

full beauty till cut down by hard frost. The plants grow 2 to 3 feet high. We offer two colors: **Pink** and **White**. Order by color. (Illustration page 21.)

Baby's Breath (Gypsophila). Old-fashioned, single white flowering variety. When cut, it is exquisite in combination with other flowers. Blooming period July and August.

Blanket Flower (Gaillardia). One of the showiest perennials. Grows about 2 feet high, blooming from late June until November. Our strain is particularly vivid in color and of unusual size. (See color illustration on page 17.)

Blazing Star or Gay Feather (Liatris). Showy and attractive both in garden and bouquets. Produces large spikes of rosy-purple flowers. Blooming period July and August. (Illustration on page 21.)

Bleeding Heart (Dicentra Spectabilis). Old-fashioned favorite, heart-shaped pink flowers in long, drooping racemes. Especially valuable for planting in shade, blooming from April until June. (75c each; 3 for \$2.00; 10 for \$7.00, postpaid.)

Canterbury Bell (Campanula Medium). Bell-shaped flowers, grow from 2 to 3 feet high. Likes good soil and lasts longer if planted in a half shady place. We offer three colors: **White, Rose** and **Blue**. Order by color. (See illustration page 17.)

Carnations (Hardy Double). We offer a selected strain in mixed colors. Bloom during June and July. Grows 1 foot high.

Chinese Lantern Plant (Physalis). An ornamental variety of the Winter Cherry, forming dense bushes, about 2 feet high, producing freely its bright orange-scarlet lantern-like fruits, which can be cut and dried, in which shape they are used extensively for floral decoration during winter. (Illustration on page 20.)

Chrysanthemums (Hardy Garden). Fall flowering perennials, form attractive clumps of foliage and flowers when other outdoor flowers are gone. Four colors: **Pink, Red, White** and **Yellow**. Order by color.

Columbine (Aquilegia) Mrs. Scott Elliotts Long Spurred Hybrids. No other flower has such grace as the Columbine. Generous in bloom, ideal for cutting purposes. Columbine play the most important part of the hardy garden and should be grown in quantity. This strain is considered the best in the world. A mixture of beautiful new shades in **Blue, White, Yellow, Pink** and **Rose**. We offer assorted colors only. Grows 2 feet or more in height.

COLUMBINE—*Aquilegia caerulea* var. *hybrida*

Perennials—Continued

Coreopsis (*Tickseed*). Flowers of rich golden color, graceful in form, ideal for cutting. Blooms entire summer and fall. Grows 2 feet high. (See illustration on page 20).

Day Lilies (*Hemerocallis*)

Orange—Gorgeous orange color lily. Thrives best in moist soil and shady places. Grows 3 feet high.

Yellow. Large, amber-yellow, lily-like flowers in June and July. Fragrant. Thrives best in moist soil and shady places. Grows 3 feet high.

Delphiniums (*Larkspur*)

***Watkins and Simpson's Covent Garden Hybrid**—This wonderful new English strain was received direct from the originators—Watkins and Simpson, Covent Garden, London, England. It is the best and finest strain to be secured anywhere. Its range of colors vary from the palest shades of blue to the deepest indigo blue and royal purple, with many intermediate tones of mauve, pink and lavender. Among these new hybrids are flowers of huge size, running mostly to double and semi-double flowers. See illustration. Grows 4 to 5 feet high. We cannot keep the colors separate. **Strong field-grown plants, 50c each; \$4.50 per 10, postpaid.**

Belladonna—Magnificent, large spikes of the most delicate turquoise-blue. Excellent for cutting, as they combine well with other flowers. Produce as many as three crops during a season, June to October. Grows 4 to 5 feet high.

Bellamosum. A very dark blue variety, excellent for planting in contrast with the lighter blue shade of the Belladonna. June to October. Grows 4 to 5 feet high.

*WATKINS AND SIMPSON DELPHINIUM

BLANKET FLOWER (*Gaillardia Grandiflora*)
Description page 16.

CANTERBURY BELLS (*Campanula*)
Description page 16.

DOUBLE HOLLYHOCKS—*Althea rosea*

Foxglove (*Digitalis*). The new **Giant Shirley** strain which we offer is considered the finest of all. Dignified and stately, the flower stalks rising from rich and luxuriant masses of leaves give an appearance of strength and make a beautiful background to a perennial garden when mixed with flowering shrubs. Grows 4 to 5 feet tall. A mixture of colors ranging from white and shell pink to deepest rose, many attractively dotted with crimson or chocolate. Illustration page 20.

German Iris (*Flags*). Orchid-like, delicate flowers in many shades on spikes 2 to 3 feet high in May and June. Should be in every perennial garden and rockery. Planted in front of shrubs their exquisite colors add warmth and tone to the border or foundation planting. A border of Iris along the path or walk is a beautiful sight to behold. For best effects, plant in groups, a half a dozen of each color to a group. We offer a magnificent range of colors. Order by color.

Clear Blue, Lavender-Rose, Light Blue, Purple, Light Violet, Orchid Color, Rose-Pink, White, White with Blue Edge, Yellow, Mahogany.

Golden Glow (*Rudbeckia Laciniata*)—Tall-growing, hardy perennial about 6 feet high. Produces a multitude of large, double, golden yellow flowers in August and September.

Hardy Primrose (*Primula*). The variety we offer—**Veris Superba**—is the largest flowered and showiest hardy Primrose grown. The flowers, in April and May, are a bright canary-yellow, with a golden center. Grows 6 to 9 inches high.

Hollyhocks (*Althea Rosea*). Stately, majestic spikes, 6 to 8 feet high, of peony-like flowers in July and August. Planted in groups as a background to the perennial garden or interspersed with shrubbery on the lawn, the bold, striking colors of the blooms produce an effect not obtainable with any other plant or shrub. We offer the following colors:

Double Rose, Double Red, Double White, Double Salmon, Double Newport-Pink, Double Yellow.

A Bargain in Mixed Hollyhocks

For group planting where individual colors are not required, we offer a special mixture comprising all the above colors. **Special Price, Strong, Field-grown Plants, \$2.00 per 10; \$4.00 per 25, postpaid.**

Lupines. Very effective. Large spikes of flowers, blooming in May and June. Plant in a semi-shady location. Grows 3 feet high. We offer a mixture of colors including clear blue, white and rose. We cannot keep the colors separate.

Mallow Marvels (*Hibiscus*). New Giant-Flowered Marshmallow (*Hibiscus*). A new, wonderfully improved type, with enormous flowers, frequently 6 or 8 inches in diameter, on dignified spikes 5 to 6 feet tall, from July until late September. Indispensable for large groups and mixed borders. Flowers resemble single Hollyhocks in shape and are exceedingly vivid in color. We offer three distinct colors: **White, Rose and Blush.** Order by color.

All perennials sold by us are strong, selected, field-grown plants. We guarantee arrival in perfect condition. To insure safe delivery, all perennials will be shipped separately by parcel post. Prices quoted include postage.

GERMAN IRIS

Perennials—Continued

A CHARMING GARDEN OF HARDY PERENNIALS

Monarda (Beebalm). Cambridge scarlet. Stout, leafy stems, 3 feet high, with heads of brilliant scarlet flowers from June to August.

Moss Pink (*Phlox Subulata*). An early spring flower, with moss-like, evergreen foliage. A mass of rose-pink bloom in April and May. Excellent for the rockery and perennial border. Invaluable for carpeting the ground or covering graves. Grows 3 to 6 inches high.

Oriental Poppy (*Papaver Orientale*). Tremendous, cup-shaped blooms of brightest crimson-scarlet, with large, purplish-black blotches at base of petals from May to July. Grows 2 to 3 feet high.

Painted Daisy (*Pyrethrum*) Hybrid Single. A profusion of chrysanthemum-shaped flowers from June through September. A mixture of colors of various shades, including white, pink, rose and darkest crimson. Their long stems and lasting qualities make them exceedingly valuable for cut flowers. Grows 2 to 3 feet high. Illustration page 20.

Red Hot Poker (*Tritoma Pfitzeri*). Unique-shaped flower heads of orange-scarlet on spikes 3 to 4 feet high from August to October. A free and continuous bloomer. Should be given winter protection.

All perennials sold by us are strong, selected, field-grown plants. We guarantee arrival in perfect condition. To insure safe delivery, all perennials will be shipped separately by parcel post. Prices quoted include postage.

How to Plant and Care For Perennials

Planting Perennials

Quite contrary to other growing things, the root systems of perennials should not be spread out. Before setting the plants the ground should be spaded thoroughly and all hard lumps of earth well broken up. Use a garden trowel or pointed round broom handle for making holes. These should be made to look like the inside of an ice cream cone. Each hole should be made just deep and wide enough to take the roots of the particular variety you are planting so that the head or crown will come about one inch below the ground surface to form a water pocket. Dip the roots of the plants in a pail of water (never let the crown or head become wet). As you lift the plant the roots will mat together and taper to a point, all ready to fit the cone-shaped hole already prepared. Place the plant in the hole just as it is taken from the water. Then press the earth tightly about the roots, pressing down and in towards the roots at the same time. Soak each plant thoroughly with water after planted. This will help pack the earth tightly about the roots, which is very important. Later, after the earth dries out again, press the earth about the plants. Never water or plant perennials during the sunny part of the day, any time after 4:00 P.M. is all right.

Shasta Daisy (*Chrysanthemum Maximum*). The Alaska variety which we offer is a vast improvement over the well-known, old-fashioned Shasta Daisy. Its handsome, large, glistening white blossoms appear in early June and last through July. Grows 2 feet high. Illustration page 21.

Sweet William (*Dianthus Barbatus*). Great masses of extremely rich-colored flowers in May and June. Grows 2 feet high. We offer a mixture of Red, White and Rose.

***Viola (*Jersey Gem*).** A beautiful new variety that blooms from May to fall. Its flowers are borne on stems about six inches long, making it a splendid subject for cutting, as well as a most desirable plant for borders. The plant is compact in growth and hardy except in extreme north, where it should have protection in winter. Illustration page 21.

Viola (*White Perfection*). Same as above, with pure white flowers.

Yucca Filamentosa (*Adam's Needle*). Of tropical appearance. Its broad, sword-like, evergreen foliage, and immense, branching spikes of drooping, creamy-white flowers rising to a height of 5 feet.

Yucca, Variegated Leaved. Same as ordinary Yucca except that its bayonet-shaped leaves have a dark bronze green center stripe, with an outer edge of yellow on each side. **Strong, 2 Year Plants, 75c each; \$7.00 per 10.**

Water your perennials frequently during dry spells. Never put any kind of fertilizer in the hole when planting any growing things. This should be applied sparingly on the ground surface only.

Pruning Perennials

Perennials require no pruning. Cut your flowers freely during blooming and enjoy their beauty in your home as well as in your garden. Cutting the flowers develops your plants and brings more blooms. If the flowers go to seed during blooming periods, cut them off and more flowers will follow.

Winter Protection for Perennials

It is advisable to protect your plants during winter. This requires very little work and your plants will reward you with more flowers the next season. After the ground has become permanently frozen cover your plants with leaves, straw or other handy litter. Lay light pieces of wood or tree limbs over the covering to keep same from blowing away. This covering should not be removed until all danger of freezing or frost is past in the spring.

PAINTED DAISY (Pyrethrum)
(Description on page 19)

FOXGLOVE (Digitalis purpurea)
(Description on page 18)

Perennials—Continued

Peonies

Truly Justify Their Popularity

PROBABLY no other perennial is more universally loved and admired. They are hardy, are not bothered by a multitude of ailments, are not particular about soils or fertilizers, do not require continual coddling or anxiety from the gardener. For the little that they need they pay back with increasing generosity. They are particularly valuable for planting in groups throughout the shrub and perennial borders. Blooming period extends from middle of May through June. Most varieties grow 2 to 3 feet high.

Prices of Extra Strong Roots, 75c each; \$7.50 per dozen, postpaid, (except where otherwise noted.)

Duchess De Nemours. Early. A lovely, pure white variety, with sulphur-white collar; medium size; fragrant.

Edulis Superba. Early, large, loose, flat crown. Bright mauve-pink; collar mixed with narrow lilac. Strong, upright; free bloomer. One of the best commercial pinks for Decoration Day.

Felix Crousse. Midseason. Brilliant red; good fragrance. **\$1.00 each; \$10.00 per dozen.**

Festiva Maxima. Early. Very large, double, creamy white, with crimson spots in center. Outer petals are sometimes tinted faint lilac, white on opening. Fragrant. The most popular white for cut flowers.

Jeanne D'Arc. Midseason. Large, globular, bomb, developing a crown. Guards and center pale lilac-rose, collar cream-white, shaded with sulphur color. Strong, medium height, free bloomer.

Karl Rosenfield. Midseason. Very large, globular, compact, semi-rose type. Dark crimson. Very strong, tall, compact grower and free bloomer. A brilliant and striking variety.

Madame Calot. Early. Very large, rose type. Pale hydrangea-pink, center shaded darker; collar tinted silver. Tall, strong grower, free bloomer.

Mons. Krelage. Late. Deep pink, with silver tips; large, compact; slightly fragrant.

Hardy Perennial Phlox

NO garden is complete without an assortment of perennial Phlox. Without them it would be difficult to maintain the brilliant display of color during the late summer. This favorite plant needs no petting—it will grow well in any average soil and bloom the first summer after being set out.

GREEN'S SELECTION

Prices of Extra Strong, Field-Grown Plants, 30c each, 3 for 75c, 10 for \$2.00, postpaid.

General Von Huetz. Bright salmon-red, white center.

Jules Sandeau. Pure pink. Very large heads.

Mrs. Jenkins. Pure white. Very early.

Mrs. Millie Van Hoboken. Soft pink. A new variety.

Purity. White.

Richard Wallace. White, with carmine eye.

Rynstrom. Lively rose-pink. Large.

R. P. Struthers. Cherry-red, suffused salmon.

Thor. Rich salmon-pink, with deep crimson eye.

Von Hochberg. Brilliant red.

April 27, 1929.

Every flower and shrub I have bought from you since five years ago, are just beautiful. I take great care of them and nearly all are even prettier than your pictures in the catalog. I always tell my friends of Green's.

PHLOX (Perennial)

A Rock Garden Will Add Charm and Distinction to Your Home Grounds

THE interest and individuality of the rock garden is seldom found in any other type of planting. Ten years ago there were very few of these fascinating gardens but today they are springing up all over the country, not only on large estates but in the yards of small city and suburban homes as well. Every home landscape should and can have a rock garden, because whether large or small it is a spot of beauty from early spring to late fall.

Our Landscape Architects Have Designed One For You

The plan shown here can be made any size or shape desired. The cross-hatched parts represent rocks, and the open spaces ground area for planting. Remember that it is not the rocks but the flowers that create the beauty of the rock garden, therefore use rocks sparingly, leaving plenty of space for planting. Always set your plants in groups consisting of three or more plants of one kind as outlined on the plan. The numbers on the plan correspond to those in the planting list, which makes it easy for you to properly locate your plants.

A plan showing placing of rocks and grouping of plants. Rocks are placed in groups with plenty of space between to allow ample room for flowers.

How to Build Your Rock Garden

After selecting the location, dig out the earth to a depth of 12 inches, fill the excavation half full of gravel, small stones or cinders to ensure proper drainage. A rock garden should never be square or flat. Oval, kidney and crescent outlines or inverted curves give the most pleasing effects. The center should always be raised if placed in the open on a flat ground surface. It is desirable to have a background if possible, afforded by a planting of shrubs or evergreens, and in this case the back portion should be raised as illustrated in the cross section plan.

No.	List of Rock Plants	Qty.
1	Iris Siberica (Siberian Iris).....	4
2	Phlox subulata rosea (Moss Pinks).....	7
3	Tritoma Pfitzerii (Red Hot Poker).....	3
4	Campanula Carpatica (Hare-bell).....	9
5	Alyssum saxatile (Basket of Gold).....	5
6	Arabis alpinum (Rock Cress).....	5
7	Gypsophila (Baby's Breath).....	1
8	Cerestium tomentosum (Snow in Summer)....	7
9	Heuchera Sanguinea (Coral Bells).....	3
10	Aubrietia Deltoides (Rock Cress).....	5
11	Dianthus Deltoides (Pinks).....	5
12	Delphinium chinense (Larkspur).....	3

The Glory of a Rock Garden can be best expressed by planting this "Approved Selection of Green's Quality Plants."

Any of the above plants sold individually at 35c ea.; 3 for 90c; 10 for \$2.50 postpaid.

Special Book Tells about Rock Gardens

A very interesting and complete book telling all about rock gardens has been written by F. F. Rockwell. It tells you in simple words how to build, locate, plants to

use, etc. This book will be sent postpaid for \$1.00 and is worth many times its cost to those interested in rock gardens.

Green's Roses

A Choice Selection of the Most Beautiful and Hardy Varieties, including Old Favorites and the New Introductions "Approved by Green's"

*ROSA HUGONIS

*Rosa Hugonis The Golden Rose from China

This beautiful new rose is unlike any other. It is of shrub-like habit in growth, reaching 6 feet in height and width. Very symmetrical. Its bright, single yellow flowers are produced on its long, graceful, arching branches, lining both sides from base to tip. The flowers appear early in April and May. Makes a gorgeous specimen or border shrub and the most beautiful hedge. **Price: \$1.00 each; \$9.00 per 10.**

*The NEW TALISMAN
Half Actual Size

This illustration is half actual size and does not do justice to this glorious new rose.

GREEN'S roses are famous for their wonderful development — all are strong, two year, field grown bushes that will bloom profusely in your garden this year. It pays well to plant Green's healthy, well rooted bushes.

Rugosa Roses

These lovely roses are absolutely hardy and attain a height of 4 to 6 feet and form sturdy bushes. These roses should not be planted in beds with other roses. Used extensively for mixing in hardy shrub borders, in foundation plantings or as specimens. They also make exquisite hedges. They require no pruning. The foliage is very attractive and flowers are followed by clusters of reddish-yellow seeds. Blooms June until frost.

***F. J. Grootendorst.** A new hybrid variety, a cross between Crimson Baby Rambler and Rosa Rugosa. The most beautiful of all. Covered with fine crimson flowers in clusters. **Price: \$1.00 each; \$9.00 per 10.**

Rugosa Alba. Large, single white flowers in clusters on strong stems. **Price: 85c each; \$7.50 per 10.**

Rugosa Rubra. Large, beautiful, single flowers of bright crimson color. **Price: 85c each; \$7.50 per 10.**

*Talisman A New Hybrid Tea Rose

The most vividly colored rose ever introduced. No illustration can do it justice. Beautiful combination shadings of gold, apricot, deep pink and old rose. Unlike most roses, the colors deepen as the rose opens. It created a sensation when first introduced and its popularity is growing by leaps and bounds. Awarded Gold Medals by American Rose Society, also at the International Flower Show at New York, and the President Coolidge Horticultural Gold Medal. It has fine green foliage and is a free bloomer. Be sure to include this gorgeous new rose in your planting. **Price: Strong, 2 year bushes, \$2.00 each; \$18.00 per 10.**

The Talisman wins Sweepstake at the Rochester Rose Show—June 1929

Mrs. William Bausch had the distinction and honor of winning the most coveted prize, the "Sweepstake," offered for the most perfect individual bloom of all roses exhibited, with a Talisman rose. The Rochester Rose Show is one of the most highly contested amateur rose shows held in America, and we feel equally honored in having Mrs. Bausch win this coveted prize because we had the pleasure of supplying the bush on which this particular rose grew.

Roses—Continued

Dwarf Polyantha Roses

Price of Dwarf Polyantha Roses: 2 year old bushes, 85c each; \$7.50 per 10.

Cecil Brunner. The popular sweetheart rose used so exclusively for bouquets at Easter time. Bushes are covered with tiny pink and white flowers from June until frost. Every garden should include them.

Crimson Baby Rambler. A dwarf, shapely little bush, 15 to 18 inches high, entirely covered with clusters of crimson flowers resembling those of the climbing Crimson Rambler. They do equally well indoors, and can be dug up and potted in the fall and kept in bloom all winter. Plant 1½ to 2 feet apart.

Climbing Roses

Price of Climbing Roses: 2 year old bushes, 60c each; \$5.00 per 10

American Pillar. A single flowering variety, with lovely pink blooms 3 to 4 inches across, with white center and yellow stamens. Very beautiful.

Climbing American Beauty. One of the best climbing roses. Healthy, vigorous growth, making 10-foot shoots. A lovely, deep, rich, rose-pink bloom of splendid form on a long stem. Fine for cutting. Extremely hardy.

Crimson Rambler. Unusually vigorous. Produces a great profusion of medium size, double red blossoms.

Dorothy Perkins. Full, double, shell-pink flowers in large clusters, very attractive.

Dr. Van Fleet. Lightest shell pink to silver flesh blooms on stems 12 to 18 inches long. Excellent for cutting. This exquisite variety is worthy of its great popularity. Hardy and vigorous.

Excelsa (Red Dorothy Perkins). Very double, crimson, produced in large clusters.

Paul's Scarlet Climber. The brilliant, vivid scarlet which this rose maintains until the petals fall puts it in a class by itself. Good-sized flowers, freely produced in clusters of from 3 to 20, literally cover the plant with bloom. Strong and perfectly hardy.

Silver Moon. A beautiful, semi-double, pure white rose, four inches in diameter, with a cluster of prominent yellow stamens in the center which greatly adds to its attractiveness.

Tausendschon (Thousand Beauties). Varies in color. A beautiful combination of colors, including several shades of pink. Semi-double.

Veilchenblau (Blue Rambler). Double flowers of light lilac, fading to light purple and blue.

White Dorothy. A duplicate of Dorothy Perkins except in color.

Yellow Rambler. Yellow buds, which fade to creamy white as the flower opens. Strong and hardy.

PAUL'S SCARLET
one of the best
climbers

GREEN'S ROSES WIN PRAISE

Gentlemen: I gave you a large order for roses last April and not one died. I have never had such splendid plants and they are still blooming. I have had roses from every large nursery, so my praise is not without experience. I shall give you another order in the spring, as I shall enlarge my rose garden. MRS. H. MCK. MOORE, P. O. Box 96, Bryn Mawr, Pennsylvania. October 2, 1929.

Roses—Continued

Hybrid Perpetual Roses

THIS type of rose is being replaced by the Hybrid Teas as they bloom only once each year in June. The following varieties are so beautiful however that rose gardens are not complete without them. By all means include them in your rose garden.

Prices of Hybrid Perpetual Roses: 2 year old bushes, 80c each; \$7.00 per 10

Frau Karl Druschki (*Snow Queen*). An ideal, hardy, pure snow-white rose. Perfect in flower, strong in growth and very free-flowering. The best pure white rose in the world.

General Jacqueminot. An old favorite and one of the best known of all roses. Brilliant scarlet crimson. Freest of bloomers.

Madam Plantier. Large, white, double flowers, wonderful fragrance, produced in abundance early in the season. A beautiful rose.

Magna Charta. Large flowers of rose carmine, very fragrant and free, on strong plants. An excellent rose.

Paul Neyron. Probably the largest rose in existence, fragrant, cream pink blossoms on long stems. Highly recommended.

(Roses continued on next page)

FRAU KARL DRUSCHKI
The Most Beautiful Pure White Rose Known

Green's Nursery Company: I wish you to know that the collection of Hybrid Roses I purchased from you this spring have been simply beautiful all summer and still are in bloom. They are even better than you claim in your catalog. MRS. EDNA M. EVERETT, 47A Austerlitz Street, Chatham, New York. September 30, 1929.

A Real Treat For Rose Lovers

Nine Gorgeous New Hybrid Tea Roses

"Approved by Green's"

How to Plant and Care for Your Roses

EVEN before the introduction of our lovely Hybrid Teas, that bloom from early spring until late fall, roses were considered the Queen of all garden flowers.

Planting Roses

Roses should be planted 2 to 2½ feet apart so that each bush is afforded plenty of nourishment and cultivation made easy. They should be planted fairly deep in the ground so that the earth level is at least 2 inches above where the branches first start out from the main trunk of the root system.

Pruning Roses

Green's roses come to you properly pruned for transplanting and no further pruning is necessary the first year. For best results your roses should be pruned annually. Proper pruning of roses is very simple. Red and pink roses require more severe pruning than the yellow and white varieties because they make more wood growth. Cut back your roses early each spring after all danger of freezing is past. A bush properly pruned should have four or five good healthy branches, each branch having five or six leaf buds. Pruned in this manner your bushes will be about 8 to 10 inches from the ground level. Yellow and white varieties should have six to eight leaf buds and be 12 to 14 inches high.

Cultivation of Roses

The ground surface about your roses should be kept loosened and never allowed to crust over. By hoeing your roses following each rain, after the ground is workable, should be sufficient. While roses require moisture they should never be planted in low areas on your grounds where water is apt to settle and remain for some time. If any prolonged droughts are experienced during the summer, water your roses thoroughly twice a week and keep the surface soil loosened.

Winter Protection of Roses

While Green's roses are of the most hardy varieties suitable for northern winters, we recommend that they be protected each winter. It is not the zero weather that causes roses to winter kill but rather the freezing and thawing experienced in the early spring. By hilling the earth up on each bush to a height of six or eight inches in late November each fall should afford ample protection. A further protection is that of covering your rose beds with leaves, strawy manure or other handy litter, after hilling up as outlined above. **Important.** This covering should never be applied until after the ground has become thoroughly frozen and crusted over. It should not be removed until all danger of freezing is past in the spring.

Green's Famous Hybrid Tea Roses

A Selection of the Best and Most Popular
Varieties in America

THE Rose is rightfully called "Queen of the Garden," and of all roses the Hybrid Tea varieties are most beautiful and will bloom from early June until late fall. We offer our customers a carefully selected list of the most hardy and popular varieties without duplication of types. You will be just as proud of them as we are.

Prices of Hybrid Tea Roses, all varieties except **Souvenir de Claudius Pernet** and the new "Approved Varieties" on pages 28 and 29, 2 year old bushes, 85c each; \$7.50 per 10. By Parcel Post, postpaid, for 5c per bush extra.

These Roses are shown in color
on the back cover page.

Columbia. One of Ophelia's daughters or sports, full petaled, rose-pink buds, deepening as the blossoms open, held erect on long, sturdy stems. Very vigorous, intensely fragrant and an excellent keeper, lasting 3 or 4 days as a cut flower.

Duchess of Wellington. Large, well-formed, semi-double, saffron-yellow buds, opening well. The most dependable yellow rose, fragrant, absolutely to be depended upon to produce flowers all during the season.

Edward Mawley. A perfectly formed rose of deep, blackish-crimson. Strong grower, fragrant and free of bloom.

Gross an Teplitz. Dark, rich crimson, the freest of bloomers and one of the favorites among the reds. Strong, tall canes, with a continuous succession of bloom, a heavy grower that does well in the herbaceous border.

Kaiserin Augusta Victoria. Well-formed, creamy buds which develop into perfectly formed, ivory-white blooms. Free blooming and hardy.

Los Angeles. A luminous flame-pink, overlaid with translucent golden yellow deep at the base. A long-pointed bud opening to a most perfect flower of indescribable beauty, with full, reflexed petals.

Luxemburg. Long, pointed buds on stiff stems, opening up to large, deep yellow, fragrant blooms. Very attractive. Excellent for cutting.

Madam Butterfly. A strong grower, producing a profusion of large flowers. Color a blending of bright pink, apricot and gold.

Mme. Edouard Herriot. Sparkling buds of coral-red and orange, opening to large, semi-double flowers of brilliant orange-red and salmon. A free bloomer and one of the most brilliant roses grown.

Mrs. Aaron Ward. Very double, pointed buds of deep Indian yellow, vigorous and compact in growth.

Ophelia. Delicate salmon flesh, shaded with rose. A variety that has made such an enviable record that it heads the list of garden roses. Long, pointed buds on stiff stems. Free blooming, with beautiful foliage.

Radiance (Pink). This rose stands high among amateur growers because of its vigorous growth, hardiness and continuous production of lovely, light silver-pink flowers, with a deeper pink on the reverse side of the petal.

Red Radiance. As good as its parent, Radiance, in habit of blossom and growth. Lovely, deep red, with an intense fragrance.

Souvenir de Claudius Pernet. Unlike most yellow roses, the color of this excellent new variety does not fade as the buds open up and the petals become exposed to the sun. Long, pointed buds, opening up to large, full, sunflower-yellow blooms. Bushes vigorous and erect. Price: 95c each; \$8.50 per 10.

AN UNUSUAL FORMAL ROSE GARDEN

Gorgeous New Hybrid Tea Roses

“Approved By Green’s”

THIS outstanding list of Everblooming Tea Roses represents the choice of experts and “Approved by Green’s” as the most hardy and beautiful of the new introductions. They are worthy companions to Green’s already famous collection of Hybrid Tea Roses.

*LADY MARGARET STEWART

*Betty Uprichard

A worthy rose of unusual color, carmine buds open to medium sized salmon blooms, suffused with orange on the inside, with coppery carmine reverse. Holds its fine color under all conditions, which makes it so popular. Strong and vigorous. **Price: \$1.00 each; \$9.00 per 10.**

*Etoile de Hollande

Considered the finest red garden rose by those who know it best. A generous and continuous bloomer, producing large, moderately double flowers of brilliant crimson-red color. Very hardy and will grow everywhere. **Price: \$1.50 each; \$12.00 per 10.**

*MME. JULES BOUCHE

*Lady Margaret Stewart

A gorgeous rose of unusual color. Its long pointed buds are deep sunflower yellow, splashed with orange-scarlet. Reverse petals suffused with carmine. As the bud opens these colors intermingle, forming a wonderful orange effect. Very sweetly scented. **Price: \$1.50 each; \$12.00 per ten.**

*Mme. Jules Bouche

Without question the best everblooming white rose introduced. The flowers are large, quite double, splendid both in the bud and when fully open. Has a slight blush tint at times. A fine vigorous grower, fragrant and very free bloomer. **Price: \$1.00 each; \$9.00 per 10.**

New varieties approved by Green’s marked *

*BETTY UPRICHARD

*ETOILE DE HOLLANDE

Hybrid Tea Roses—Continued

*Mrs. Charles Bell

Similar in habit to Radiance, of which it is a sport. Its color is entirely different, being a lovely shell-pink with salmon shadings. Splendid buds and fine, globular blooms. **Price: \$1.00 each; \$9.00 per 10.**

*Mrs. Henry Morse

The most beautiful two-tone pink rose ever introduced. It has well-formed, fine pink buds, with a lighter shade inside, and as the flowers open into blooms of great size, the beautiful two-tone pink effect results. Very fragrant, healthy and hardy. Highly recommended. **Price: \$1.00 each, \$9.00 per 10.**

*Rev. F. Page Roberts

Another new rose, deservedly gaining great popularity. Long buds of coppery-red color, which develop into a beautiful shade of golden yellow. A vigorous grower, with fine foliage. **Price: \$1.00 each; \$9.00 per 10.**

*Souvenir de Georges Pernet

Truly a beautiful rose, with long pointed buds of rich pink, tipped with carmine and suffused with a golden sheen. Fine double flowers in abundance, which have never been matched for form or color. A strong low-growing variety. **Price: \$1.00 each; \$9.00 per 10.**

*Willowmere

A handsome, large rose of excellent form, clear pink, glowing with light orange. Flowers repeatedly, a hardy and vigorous grower, with good foliage. **Price: \$1.00 each; \$9.00 per 10.**

*MRS. HENRY MORSE

*MRS. CHARLES BELL

*WILLOWMERE

*SOUVENIR DE GEORGES PERNET

Hedges—Beautify as they Serve

HEDGES fulfill a universal demand for artistic borders for the home grounds. They afford better protection than unsightly fences. A border formed by hedge plants will grow more beautiful each year, while common fences deteriorate. There are varieties to meet your particular fancy. For a formal or defensive hedge, particularly where a definite outline is desired, we recommend California, Regals, Ibolium Privets, American Arborvitae and Japanese Dwarf Barberry. Flowering shrubs also make beautiful hedges or borders, particularly VanHouttei Spiraea, Hydrangea, Snowberry, Altheas and Bush Honeysuckles.

Privets (*Ligustrum*)

California (*L. ovalifolium*). An almost evergreen shrub of dense, shapely habit, with shining, dark green foliage and a few minute flowers in June. Universally popular as a hedge plant because it stands trimming well and can be kept at any height or in any shape desired. The most desirable shrub for a hedge 3 to 5 feet high. Usually planted in single rows 10 inches apart, but where a broad hedge is desired, can be set in double rows, the rows 1 foot apart with the bushes 1 foot apart in each row, but alternated or staggered so as to come 6 inches apart in the hedge. Untrimmed, California Privet grows upright 8 to 12 feet and makes a very fine windbreak for the vegetable garden. Excellent for planting alone as single specimens. Not hardy in extreme Northern states, for these we recommend Ibolium Privets.

PRICES OF CALIFORNIA PRIVET

SIZE	10	100	500 or more at 1000 rate
3 to 4 feet.....	\$2.50	\$12.00	\$80.00 per 1000

1½ to 2 feet.....	1.25	6.00	50.00 " "
Parcel Post Size—18 to 24 inches, \$1.50 per 10, postpaid.			

Ibolium (*L. ibolium*). A remarkably sturdy and cold-resistant variety of privet, very similar in foliage and appearance to the well-known California Privet. We recommend this variety very highly for climates too cold for the California variety. Plant same as California.

PRICES OF IBOLIUM PRIVET

SIZE	10	100
2 to 3 feet.....	\$2.00	\$15.00
1½ to 2 feet.....	1.60	12.00
Parcel Post Size—18 to 24 inches, \$1.75 per 10, postpaid.		

Regel's (*L. regelianum*). A low-spreading bush, with graceful, drooping branches. White flowers, followed by blue-black berries that last all winter. Autumn foliage, rich red. Grows 6 to 8 feet high. **Price: 2 to 3 feet, 50c each; \$4.00 per 10.**

Barberry (*Berberis*)

Japanese Dwarf Barberry (*Berberis Thunbergi*). A very attractive dwarf shrub, barely 3 feet high under the best conditions. Dense in growth, yet graceful on account of its drooping branches. Its yellow flowers are borne on long stems followed by scarlet berries in great profusion, clinging through most of the winter. The leaves color to scarlet and gold in the autumn. Very desirable for planting as single specimens and used extensively in foundation plantings, or in borders planted in front of taller-growing shrubs. Very desirable for planting in corners where sidewalks meet. For a hedge not over 2 to 3 feet high, this makes a very desirable shrub. Very hardy. As a hedge, set bushes 2 feet apart.

PRICES OF JAPANESE DWARF BARBERRY

SIZE	Each	10	100
2 to 3 feet.....	\$0.50	\$4.00	\$30.00
1½ to 2 feet.....	.40	3.00	20.00

Rates—On all Hedge Plants. Ten to fifty at ten rates. Fifty or more at hundred rates.

Windbreaks

For protection against strong winds, nature has given trees for this use. The most effective varieties are listed below according to their popularity, giving proper spacing for each.

- Norway Spruce..... 5 to 10 feet apart
 - American Arborvitae..... 3 to 5 feet apart
 - Lombardy Poplar..... 5 to 10 feet apart
 - California Privet..... 1 to 3 feet apart
- For quick results we advise the closest distances.

An Attractive Hedge Is Useful as Well as Ornamental

Green's Choice Evergreens

Will Add Dignity and Coziness to Your
Grounds in Winter or in Summer

TRULY the aristocrats of freedom, lending year around beauty to your home surroundings. Their varied shades of green, blue and silver make possible the most attractive combination of colors. Planted about the foundation of a home they give dignity, coziness and warmth not attained by any other class of trees or shrubs. Their attractiveness is unsurpassed during any season of the year. Styles change in landscaping as in other things. Solid foundation plantings are not used. It is better taste to group evergreens about the entrance and corners, connecting them with flowering shrubs, or rhododendrons. Selection of varieties is made easy by our complete descriptions. Our Landscape Department will gladly furnish complete and individual plans for their planting. This service is described on pages 34 and 35.

Evergreens

Arborvitae (*Thuja*)

American (*T. Occidentalis*). A beautiful pyramidal-shaped tree, with deep green, feathery and spray-like foliage. Used extensively for foundation plantings. It should be planted at the corners of the home in groups of two or three, or at the entrance as single specimens. We also recommend it very highly for hedges or windbreaks, as described on page 30. Can be kept to any desired height if annually trimmed in late August. We advise trimming, as this thickens its foliage. Allow 3 foot spread.

Prices

Size	Each	10
2 to 2½ feet.....	\$2.00	\$18.00
3 to 3½ feet.....	3.00	27.50
4 to 4½ feet.....	4.00	37.50
4½ to 5 feet.....	5.00	45.00

George Peabody (*T. Occidentalis Lutea*). A broad, pyramidal type, with beautiful golden foliage. Affords beautiful contrast when grouped with dark green varieties. Allow 3 foot spread. **Price: 1½ to 2 feet, \$3.00 each.**

Globe (*T. Globosa*). The foliage is identical with that of the American Arborvitae, but radically different in its habit of growth. This is a truly dwarf-growing type, rarely over 2 to 3 feet high, forming an almost perfect ball shape. Fine for planting in front of taller growing evergreens, also under windows, and unexcelled for tubs. Allow for 2 to 3 foot spread. Illustration page 32. **Price: 1 to 1½ foot spread, \$2.25 each; 1½ to 2 foot spread, \$3.25 each.**

Hovey's Golden (*T. Occidentalis Aurea Hoveyi*). Light golden green foliage. Semi-dwarf, growing 3 to 4 feet. In a dense conical shape afford fine contrast when grouped with dark green varieties. Allow 3 foot spread. **Price: 15 to 18 inches, \$3.00 each.**

Pyramidal (*T. Pyramidalis*). An extremely compact, pyramidal-shaped variety, very similar in character to the American Arborvitae. Its foliage, however, is much thicker and of a darker green color. We recommend it for foundation planting in preference to American Arborvitae, particularly when used about the entrance, due to its narrow and compact manner of growth. It retains its fine dark color throughout the winter months and can also be kept to any desired height by annual trimming. Allow 2½ foot spread. Illustration page 32. **Prices: 2 to 2½ feet, \$3.50 each; 2½ to 3 feet, \$4.00 each; 3 to 3½ feet, \$5.00 each; 3½ to 4 feet, \$6.00 each.**

Junipers (*Juniperus*)

Creeping Juniper (*J. horizontalis glauca*). A trailing variety, with fine blue foliage. One of the best evergreens for ground covering. Allow 3 foot spread. **Price: 1½ to 2 foot spread, \$4.00 each.**

Irish (*J. hibernica*). Very compact grower, forming a slender pyramid. Fine foliage of bluish green color. Allow 2½ foot spread. **Price: 2 to 2½ foot, \$3.50 each.**

Pfitzer's (*J. Chinensis pfitzeriana*). A low-spreading type, with lacy foliage of blue-green color. The branches grow horizontally from the stem, forming a flat, spreading top. Very hardy and should be included in every foundation planting in front of taller varieties and under windows. Allow 3 foot spread. Illustration page 32. **Prices: 12 to 15 inch spread, \$3.00 each; 18 to 24 inch spread, \$4.00 each.**

THIS ILLUSTRATES HOW TO ARRANGE YOUR EVERGREENS BEFORE PLANTING.

Evergreens—Continued

Red Cedar (*J. virginiana*). A very hardy, pyramidal-shaped variety, with light green foliage, which becomes darker as the season advances, tips having pinkish tinge during winter. A rapid grower and used extensively for foundation planting. Allow 3 foot spread. **Price: 2 to 3 feet, \$5.50 each.**

Silver Red Cedar (*J. V. glauca*). The entire young growths have an almost silvery whiteness, which changes to a beautiful bluish green as the season progresses. One of the best varieties for foundation planting, affording wonderful contrast. Allow 2½ foot spread. **Prices: 2½ to 3 feet, \$4.00 each; 3½ to 4 feet, \$5.00 each.**

Pines (*Pinus*)

Austrian (*P. nigra*). Another fine evergreen of the Christmas tree type, spreading at the base when fully grown to 12 feet or more, and tapers to a rounded point. Its branches are made up of many smaller ones 4 or 5 inches long, and covered with long needles of fine, dark green color. Excellent for single or group plantings about your grounds. Very hardy. **Price: 2 to 3 feet, \$4.00 each.**

Mugho (*P. montana mughus*). A dwarf, globe-shaped evergreen, with dark green foliage. Each spring when the new growth starts it is covered with little shoots resembling hundreds of little candles. Its growth is dense and low, making it one of the best varieties for planting under windows, also in front of taller types, never growing over 4 to 5 feet, and can be kept lower by trimming. Highly advised. Allow 3 to 4 foot spread. **Prices: 1 to 1½ foot spread, \$4.00 each; 1½ to 2 foot spread, \$5.00 each.**

Spruce (*Picea*)

Colorado Blue (*P. pungens glauca*). Unquestionably the most beautiful of all evergreens, beyond words of description. Its foliage of rich, glistening blue, its stately and symmetrical growth are admired by all. You will be justly proud of having one or more of these beautiful trees on your grounds. Unexcelled for specimen plantings, which will add distinction to your home. **Prices: 1½ to 2 feet, \$6.00 each; 2½ to 3 feet, \$10.00; 3 to 3½ feet, \$15.00 each.**

Colorado Green (*P. pungens glauca*). Having the same fine characteristics of the Blue Spruce except color. When seeds of the Colorado Blue are planted in the nursery, only 25 per cent become blue, the balance are green, with only a slight bluish cast and cannot be classed as true blues. They are exceedingly attractive. **Prices: 1½ to 2 feet, \$5.00 each; 2½ to 3 feet, \$4.00 each; 3½ to 4 feet, \$5.00 each.**

Norway (*P. excelsa*). The time-honored Christmas tree, universally used for this purpose. Its foliage varies from fine shades of rich, dark green color to very light green. Planted more extensively than any other evergreen. Its popularity for planting in tubs for decorating public and private entrances is fast growing. Also used for window boxes and group plantings. Used for windbreaks and hedges more extensively than any evergreen because it is a fast grower, very hardy and gives the most complete protection. (Windbreaks on page 30). Highly recommended. **Prices on next page.**

Yew (*Taxus*)

English (*T. repandens*). The most hardy of all prostrate varieties, lustrous, slender green leaves that curve slightly upward. Excellent for low plantings. Allow 2½ foot spread. **Price: 1 to 1½ feet, \$5.00 each.**

Dwarf Japanese (*T. cuspidata nana Brevifolia*). An excellent dwarf type, with beautiful spreading branches and short, rich green leaves. Highly recommended. Allow 2½ foot spread. **Price: 1 to 1½ feet, \$4.50 each.**

Japanese (*T. cuspidata*). A beautiful bushy variety, with spreading habit, reaching a height of 4 to 5 feet. Foliage stays a rich deep green all winter. Allow 3 foot spread. **Price: 1 to 1½ feet, \$4.00 each.**

How to Plant Evergreens

All of our evergreens come with the roots balled in earth. First, place the evergreens in the locations they are to be planted, then dig the holes a foot larger and slightly deeper than the ball of earth surrounding the root systems. Place some good top soil in the hole, then place the tree in the hole. Do not remove burlap as it disturbs the soil about the roots. It is only necessary to roll it back or cut it away from the top as the remainder will soon rot away. Fill the hole two-thirds full of earth and stamp down firmly. Then fill the remainder of the hole with water and allow this to settle, after which fill up the hole with soil and pack firmly. Water frequently during the first week or ten days but do not allow water to get on the tops.

Rhododendrons—(Broad-Leaved Evergreens)

RHODODENDRONS should be planted in shady locations where they are protected from the sun and strong winds. Although most effective when planted in masses, smaller groups add greatly to the beauty of one's grounds tucked in corners about the house or lawn. All Rhododendrons are balled and Burlapped.

We offer a selected group of Hybrid varieties in the following colors. **WHITE, PINK, PURPLE, RED.** Please order by color. **Prices of all Hybrid varieties, 1 to 1½ feet, \$5.00 each.**

The two most popular Native varieties:

Catawbiense—Lavender and purple flowers. Blooms in June. Very hardy.

Maximum (*Great Laurel*). White shaded to shell pink flowers. Blooms in July. Very hardy.

Prices: 1½ to 2 feet, \$4.00 each.

Important

How to Plant and Care for Rhododendrons

The soil in which Rhododendrons are to be grown is a most important factor in their successful culture. A light garden loam is best, but if clay soil must be used, lighten it with sand, leaf-mold, decayed sod, or surface soil that has been heavily manured the previous year—all are good.

Make the Rhododendron beds at least 2½ feet deep, mixing the soil with decomposed cow-manure or leaf-mold, and then place your plants in groups in the most effective manner. All plants should be thoroughly soaked in water previous to planting. A mulch of about 4 inches of leaves or well-rotted manure (never fresh manure) will help conserve the moisture which is so necessary to successful Rhododendron culture. Allow weeds to grow until they are large enough to be pulled by hand—never hoe the soil about the plants as the roots are near the surface. In the fall, after the ground has been slightly frozen, mulch the soil between the plants to a depth of 8 inches with leaves. This will protect the roots from the most severe frosts, and after a time the leaves will begin to decay and form leaf-mold—the best fertilizer for Rhododendrons.

Green's Landscape Department

Our Landscape Architects Will Furnish Individual Planting Plans For Beautifying Your Home Grounds

THEY are experts with thorough knowledge of plant life and landscape design, and hundreds of homes in America owe their attractiveness to them. Entrust your planting problems to us and you, too, can have beautiful home surroundings. Our architects will faithfully design them and carefully select varieties best adapted to your particular needs, arranged in pleasing harmony that will give year around beauty.

Green's Method Makes It Easy

By experience gained in solving the planting problems of our customers for many years, we have prepared special Sketch Blanks with complete instructions, making it very easy for you to prepare the rough layout of your house and grounds. All we need is the size of your lot, the location of your house, walks, drives, etc., with the proper measurements. This is the information that we would obtain if we were right on your grounds. Our architects carefully study these layouts in our office before preparing the planting plan and are able to clearly visualize your grounds, therefore you get the same service that you would if you lived right here in Rochester.

Detailed Planting Plans Furnished

Our planting plans are complete in every detail, showing you just where to place the trees, plants and shrubs recommended, with an itemized list of varieties, with numbers corresponding with those on the plan. You receive a blueprint of the plan; we keep the original drawing on file in our office for reference. We want every customer completely satisfied and are always glad to make changes in the original plan if desired.

How To Follow Plan Explained

Green's customers find it easy to follow the plan because complete instructions are sent with your plan, telling just how to follow it. We tell you in detail just how to properly locate the plant material and form the border lines shown on the plan. When your planting is completed and your grounds have been transformed into a beauty spot, you will be thrilled by your own accomplishment.

Planting Booklet Tells How to Plant

Our "How to Plant" booklet will be sent with your plant material, explaining in simple words just how to plant. It is very complete with many illustrations. With this helpful guide the most inexperienced person will have complete success in planting growing things.

Not Necessary to Complete Entire Planting in One Year

The actual planting can be done gradually from year to year if you so desire, regardless of the size. It is best, however, to plan the entire layout at one time so you may know just how your grounds will look when finished.

A Planting Plan Will Save You Money

You actually save money by having a detailed planting plan prepared. The common fault that most people make when doing their own landscaping is that they overplant to their disappointment. This not only spoils the effect of their planting but eventually has to be taken out. It is best, therefore, to have your home planting designed by experts. Send for our special sketch blank and be assured of beautiful home surroundings.

This Complete Landscape Service Is Free If You Order From Us

This is just a part of Green's policy of giving their customers quality, satisfaction and service. We make no charge for planting plans, providing the order for the plant material is placed with us. It takes hours to conscientiously prepare and draw these plans and therefore in order to do justice to them, we require a deposit sufficient to cover the actual cost without profit. This deposit, however, is credited on your order when received. The deposit required is based on the size of your property as outlined on next page, 35.

ONE OF OUR DETAILED PLANTING PLANS SHOWN ABOVE

Green's Landscape Department

Mr. Harry Boone, Landscape Architect in charge of our Landscape Department.

"IT'S NOT A HOME UNTIL IT'S PLANTED"

The real beauty of any home depends on its surroundings. Until it is planted it presents a barren sight—but what a transformation takes place when surrounded with beautiful growing things arranged in pleasing harmony.

A BEAUTIFUL "OUTDOOR LIVING ROOM"

Designed by Mr. Boone. Another view of this same garden is shown in colors on the cover of this catalog. We will be glad to design a garden of similar beauty for your grounds so that you may enjoy the charm of a living room out of doors.

A DELIGHTFUL POOL

Also designed by Mr. Boone. To know the real beauty of an artistic pool, which reflects the charm of its surroundings is to have one of your own. The proper setting for a pool on your ground can best be determined by our Landscape Architect.

Green's Fruit Department

“Fruit Tree and Small Fruit Specialists For Over 50 Years”

Green-Grown Fruit Trees and Plants are true to name

FOR over half a century we have been recognized as fruit specialists. Mr. Charles A. Green, founder of our business, became a nationally known authority on fruits through his careful study of every phase in propagating and marketing fruits. His predictions regarding the success and value of our now leading fruits, when first introduced, have materialized. With these years devoted to the growing of better fruit trees and plants, you may be assured of getting the best stock that can be grown anywhere. The soil on which our stock is grown is carefully selected, fertilized, cultivated, and the trees and plants sprayed thoroughly, making them free from disease. This careful attention results in strong trees and plants, with fine root systems and top growth, which are carefully graded in a way that pleases the most particular customers. All inferior or crooked trees are discarded. Green-Grown Varieties can be purchased with confidence.

Green's Standard Apples

Varieties of Proven Value for Commercial Orchards and Home Plantings

WE and other authorities strongly recommend that commercial planters standardize on varieties of proven market value. Varieties offered by us have been selected after careful study of market and growing conditions, and the cooperation of the various state departments of agriculture. You will find Green's trees exceptionally well rooted, with fine developed tops and evenly graded. Plant standard apples 35 feet apart each way.

Prices of Standard Apple Trees (Except Cortland and McIntosh)

Smaller	3 to 4 ft.	60c	4.50	25.00

By Parcel Post, 2½ to 3½ ft. 50c each, \$4.00 per 10, postpaid.

Rates: Less than 10 at the each rate. Ten to fifty at the ten rate. Fifty or more at hundred rates.

Summer Apples

Sweet Bough. A large, pale, greenish-yellow, sweet apple of excellent quality. Should be in every home orchard. Ripens in July.

Red Astrachan. The best mid-summer cooking and eating apple for home and market. Yellow, splashed with deep crimson. Brisk sub-acid in flavor. Very good in quality. The tree is medium in size, a reliable cropper, very hardy and usually bears the third or fourth year. Ripens in July and keeps until September.

Williams' Early Red. Among the earliest to ripen and the largest of all early apples, a better name for it is "Big Red Apple." Flesh is white, juicy and slightly tart, tender and crisp. A very good one, like Transparent, bears heavily on young trees.

Yellow Transparent. One of the best of the extra early apples; waxy-yellowish white, mild acid, juicy and pleasant. Bears annually, usually starting the fourth year. Extremely hardy in the North. A good filler tree. Ripens late in July and continues in season until September.

Apples—Continued

Autumn Apples

Gravenstein. A variety of excellent quality. For culinary purposes unexcelled by any of its season. The skin is slightly rough and of an orange-yellow color, overlaid with broken stripes of light and dark red. Sprightly sub-acid in flavor. The trees grow rather large, come into bearing early, are productive and reliable croppers. Moderately hardy. The fruit ripens about the middle of September and continues in season till early November.

Oldenburg. Often called Duchess of Oldenburg, or just Duchess. Has excellent culinary qualities; pleasant to eat out of hand when fully ripe. Skin is yellow, with splashes and stripes of red. A good filler tree, as it is dwarf in habit. Comes into bearing at about the fourth year. In season late August and September.

Twenty Ounce. One of the most satisfactory of the fall varieties for commercial planting. Large, attractive, greenish-yellow, with broad stripes and splashes of red. Bears young, annually, and is a good cropper. Ripens in September and keeps until early winter.

DELICIOUS APPLE (Description below)

Winter Apples

Baldwin. Due to its dependability, desirable season, good size, attractive color and good quality, Baldwin is a leading commercial variety for New York, New England, Ohio and Michigan as well as being popular in many other states. Large, strong, vigorous trees, producing an abundance of large apples of a bright red color, with yellowish, crisp, tender, very juicy flesh. Agreeably sub-acid in flavor. Very good in quality. Rather slow to come in bearing, but rapidly makes up for lost time when it begins bearing. Long lived. Ripens in November and lasts until April in common storage and to May or later in cold storage.

***Cortland.** See illustration and complete description on page 41.

Delicious. Sometimes called Stark's Delicious. A really delicious apple, with a distinct flavor all its own. A high quality apple. Fruit large, somewhat conical in shape, tapering at the base into five distinct knobs. Its beautiful crimson and unique shape make it an ideal apple for the fancy or box trade. Sells readily for high prices at the fruit stands. The flesh is crisp and juicy. Mild in flavor, but not a sweet apple. Has a decided aroma which is very pleasing. The tree is hardy, vigorous and productive. Bears about the fourth year. In season from November until May.

Fameuse. Better known as Snowapple. Its white, tender, exceedingly crisp flesh and mild sub-acid flavor make it a delicious eating apple. It is a moderate grower, producing rather heavy crops of medium-sized, dark red fruit, almost annually. Hardy. Succeeds well in the North. Ripens in November and keeps until January.

Grimes Golden. The best yellow apple. Desirable for both dessert and culinary uses. It is a fine apple for the home garden. Flesh yellow and firm, with a rich, refreshing flavor. Tree bears early. Vigorous. In season November to January.

Hubbardston. By many known as Hubbardston Nonesuch. Identical, we believe, with American Blush. Considered one of the most profitable varieties of its season, ripening as it does between the Autumn varieties and the late ripening winter apples. Fruit large, of good flavor, mottled red and yellow in color. In season October to January.

NORTHERN SPY APPLE (Description on page 38)

Winter Apples—Continued

Jonathan. A very beautiful bright red apple, highly flavored, and of excellent quality for either dessert or culinary uses. Is much in demand as a fancy apple during the holiday season. Grows best in the Middle West, where it attains its full size. Under favorable conditions, the tree is a reliable cropper, bearing good crops biennially. In season November to January.

McIntosh. In our opinion, not equaled in quality and flavor by any other variety with the exception of the Cortland, its progeny, which it resembles very much. Due to its very high quality and its exceedingly attractive appearance, it commands a ready sale and a fancy price in all of the large Eastern markets. Has held the record for high price for years in Boston, New York, and Chicago markets. Rapidly making a place for itself as one of the leading if not the leading commercial apple in the East. The fruit is very attractive in appearance, of bright deep red color, which in highly colored specimens is almost purplish-red, overspread with a thin lilac bloom. Fruit above medium in size, with white, firm, very crisp flesh, fine grained, tender, very juicy. Sprightly sub-acid in flavor with a characteristic perfume and aroma. The tree is rather a strong grower, very hardy and healthy. Comes into bearing about the fourth year and is a reliable cropper, yielding good crops. We recommend it highly to orchardists. In season from October to December or later.

Prices of McIntosh Standard Apples

Size	Height	Each	10	100
Large	5 to 7 ft.	\$.85	\$7.00	\$50.00
Medium	4 to 5 ft.	.75	6.00	40.00
Small	3 to 4 ft.	.65	5.00	30.00

By Parcel Post $2\frac{1}{2}$, $3\frac{1}{2}$, \$.60 each; \$4.50 per 10. Postpaid.

Northern Spy. An old-time favorite with a distinct flavor that appeals to those who like a brisk, spicy apple that is not actually sour. One of the leading commercial varieties. The fruit is large and attractive, being of bright red color, overspread with a delicate bloom. The flesh is very juicy, crisp, tender, and most excellent for either dessert or culinary purposes. An excellent keeper. It is too tender and juicy for evaporating. May be slow to come into bearing, but has been known to bear paying crops in seven years. Bears moderate to heavy crops biennially, or almost annually. Being a late bloomer, it sometimes succeeds when others fail from late frost damage. Ripens November.

Pumpkin Sweet. Generally known in Central and Western New York as Pound Sweet. One of the best sweet apples of its season for baking, and for canning or stewing with quinces, but generally is not valued for dessert. Fruit very large, yellow in color. The tree is a strong grower, long lived and fairly hardy. A pretty reliable cropper, yielding good crops biennially. In season from early October to January.

Rhode Island Greening. Commonly called by the simple name of Greening. As a cooking apple it is unsurpassed, and as a dessert fruit of its season, has few equals. It is a good variety to grow with Baldwin in commercial orchards, because, being a little earlier in season, it can be picked and marketed before it is necessary to pick Baldwin. The fruit is large, yellowish-green, often with a dull blush. It is long lived, productive and a reliable cropper. In season from October through January.

Rome Beauty. A medium to large apple, yellowish, more or less mottled with bright red. It is thick skinned, stands handling well and is a good keeper. It has an established reputation in market and sells at a good price. Ripens in November and keeps until April or May.

A Green-Grown Apple Tree

Note Fine Root System and Strong, Sturdy Top Growth

Green's Fruit Trees are True-to-Name

A Block of Two Year Old Apple Trees—Note the Clean Straight Trunks and Well Shaped Heads

Winter Apples—Continued

Roxbury Russet. The most popular russet apple. An excellent keeper, of good size, with a russet-brown skin and a bronze blush in highly colored specimens. Flesh is tinged with yellow or greenish, firm, somewhat coarse, moderately tender and crisp. Sprightly, sub-acid in flavor. Good to very good in quality. In season from December to July.

Stayman's Winesap. Fruit medium to large in size, yellowish, striped and splashed with dull red in color, and with a firm, crisp, yellow flesh, mildly sub-acid in flavor. Good quality. Comes into bearing about the fourth year and is a reliable annual cropper. In season from December to May.

Tompkins King. More often known as King or King of Tompkins County. Large, attractive, beautiful red fruit, a regular bearer, yielding moderately heavy crops annually. In season from October to January.

Tolman Sweet. A medium size, whitish-yellow, sweet apple, much esteemed for pickling, boiling and baking. Very hardy. Ripens in November.

Transcendent Crab. This for many years has been one of the most popular of the crab apples. The fruit is medium to rather large, skin clear bright yellow, with red cheek overspread with bloom. Flesh yellow, crisp, juicy, somewhat astringent and sub-acid in flavor. Very good for culinary uses. A good grower, hardy, and usually very productive. In season from late August to middle of September or later.

Wagener. The fruit is medium to large, bright red in color, having a fine texture, high flavor, and excellent quality. Good for cooking, but especially prized for dessert. A steady bearer, needing to be thinned to keep it from overbearing. In season from October to February or later.

Standard Apples continued on next page.

Green's Dwarf Apple Trees

Require Little Space - - Bear Young - - Have Large Fruit

DWARF Apple trees are ideal for the home garden. They are very low growing, and the fruit may easily be picked from the ground without the use of ladders. Dwarf Apple trees come into bearing sooner and produce larger size fruit, equal in color and quality to standard trees. Especially recommended in small garden spaces and as fillers in newly planted orchards of standard trees. Plant 10 feet apart each way.

Prices of Green's Dwarf Apple Trees

Two Year Old Well Branched Trees

McINTOSH—Unsurpassed in Quality
See description page 38

Winter Apples—Continued

Wealthy. Particularly valuable in cold climates where a hardy tree is needed. A thrifty grower when young, but forming a medium sized tree. Planted in commercial orchards as a filler between rows of stronger growing varieties. Fruit is very attractive red and yellow color, rated good to very good quality. In season from October to January.

Winter Banana. An exceedingly attractive yellow apple, usually with a bright red cheek. Has distinct banana flavor and good dessert quality. Keeps well. Have kept them in ordinary home cellar in excellent condition until May. Is thrifty, bearing when young and almost annually. Moderate to heavy crops. In season from mid-November to April first.

York Imperial. This is a fine, hardy, large red winter apple. It succeeds over a wide range of country. Comes into bearing at four years from planting, bears regularly and heavily. The foliage and fruit are remarkably free from scab. The fruit is of medium size, skin yellow and almost wholly covered with two shades of red. November to February.

WINTER BANANA
An Unusual Apple With a Distinct Banana Flavor

Plant Green-Grown Cortland Apple Trees

“APPROVED BY GREEN’S”

The Scientifically Improved McIntosh

MR. GREEN’S prediction of the success of the Cortland Apple, when first introduced, is now a reality. We were the first nurserymen to start propagating Cortland, the buds coming direct from trees that were grown at the New York State Agricultural Experiment Station, Geneva, New York. It is outselling McIntosh three to one. We, and other authorities, firmly believe that it will become the leading commercial variety in the entire eastern and northern sections of the country.

Cortland Cannot Be Surpassed

Professor U. P. Hedrick, of the New York State Agricultural Station, has this to say about Cortland: “The Cortland cannot be surpassed by apples grown anywhere in the world, and apple growers in New York and New England have opportunity to specialize in a distinctive fruit that will bring renown and profit to the industry of the region.

*Description of Cortland

The fruit of Cortland is as large or larger than that of McIntosh, round to somewhat conical in shape. In color it is a bright red, blushed with darker red, splashed and striped with carmine and more or less overlaid with a deep purplish bloom. The flesh is white, firm, fine grained, crisp, tender, very juicy, aromatic, perfumed, sprightly sub-acid, and very good to best for dessert. The trees are large, vigorous, upright-spreading, very hardy, productive and healthy. Flowers bloom in mid-season. Fruits about two weeks later than McIntosh. Bears very young and full crop every year.

Cortland has been given the highest honors obtainable in the horticultural world. The American Pomological Society awarded to Cortland the Wilder silver medal for new fruits. To qualify for a Wilder medal, a new fruit must exhibit superiority to all existing varieties with which it will compete.

Nine Reasons Why You Should Plant Cortland Apple Trees Now

1. Cortland apples are of the highest quality and flavor—equal to McIntosh. Just what the apple eating public demands.
2. Cortland bears quickly—the third and fourth year after planting—a money crop the sixth year. No long wait for returns on your investment.
3. Cortland apples hang on the tree unusually well—do not drop or blow off. No losses from unmarketable fruit. Has an exceedingly long picking season.
4. Cortland apples are very easy to handle and pack—do not bruise easily. Reach the consumer in perfect condition.
5. Cortland apples are large and uniform in size and shape. A large percentage will grade number one.
6. Cortland should be picked later and will keep longer than McIntosh.
7. Cortland is an annual bearer—sets an abundance of fruit buds. No off season.
8. Cortland apple trees are very thrifty and fast growers. The trees develop an abundant framework to carry big crops.
9. Cortland apples have the bright red color that appeals so strongly to the apple eating public. Their beautiful and attractive appearance sells them on the open market at \$5.00 per bushel.

Green's Cherries

WE offer a selection of choice varieties—the result of over fifty years' experience as fruit growers. Due to a rapidly increasing demand for fruit juices, cherries are becoming more profitable every year. Every orchard and home garden should have a few of Green's thrifty, vigorous, well rooted cherry trees. Plant sour cherries 15 feet and sweets 20 feet apart each way,

MONTMORENCY
CHERRY

Sweet Cherries

Prices of Sweet Cherry Trees

Two Year Old Trees

Size	Height	Each	10
Largest	5 to 7 ft.	\$1.00	\$9.00
Medium	4 to 6 ft.	.90	8.00

We do not offer Sweet Cherries in parcel post sizes.

Black Tartarian (Black). The favorite home garden sweet cherry. Produces immense crops of heart-shaped cherries, bright, glossy, purplish black. Flesh tender, juicy, rich, and of best quality. Ripens middle of June.

Governor Wood (Yellow). Large, beautiful, yellowish white, tinted with shades of crimson, with conspicuous russet dots. The flesh is tender, juicy, the best in quality. Ripens in June.

Napoleon (Light Red). Sometimes called Royal Ann. Color bright red on a yellowish background. The flavor is rich and sweet, which, with the abundant juice and firm, crackling flesh, makes it a most delicious and refreshing cherry for dessert and home uses. Ripens in July.

Windsor (Dark Red). The leading late sweet cherry. Large, very dark red, with firm, tender, juicy flesh. Prolific and of excellent quality. Ripens in July.

Sour Cherries

Prices of Sour Cherry Trees

Two Years Old

Size	Height	Each	10	100

By parcel post—2 to 3 ft., 60c each, postpaid.

Rates—Less than ten at each rates. Ten to fifty at ten rates. Fifty or more at hundred rates.

Early Richmond. The best of the early sour varieties. Medium size, light red, changing to dark red, tender, juicy and of good quality. Vigorous, healthy and fruitful. Ripens in June.

English Morello. The standard late sour cherry. The fruit is very dark red, becoming almost black in color. The trees are hardy and very dwarfish in habit. Ripens in August. The leading commercial variety of sour cherry.

Montmorency. For any and all purposes Montmorency may be recognized as the best. The fruit is about average in size, rather dark red, tender, juicy and of very good quality. Hardy and very productive. Ripens last of June.

We List Only the Choice Varieties

We do not believe in confusing our friends by listing all the varieties of cherries.

Success will be yours, if you confine your selection of cherry trees to any of the fine varieties listed on this page.

All Our Fruit Trees are Budded on the Finest Whole-Root French Stock

Important

We properly prune all sweet cherries before shipping which must be done to assure success in transplanting. The tops of sweet cherries develop very rapidly, but the root systems are very small in comparison. This fact makes it vital that the tops be cut back and that unusual precautions are taken when setting to plant them deeply and pack the earth tightly about the root and water frequently for the first 2 or 3 weeks.

Cherries make the most delicious pies and preserves, and pay big profits on the market

Green's Plums

COMPARE our selection of plums with those already in bearing by the commercial orchardist and small fruit gardener. We offer only the most profitable and select varieties which have proven their quality and worth. The trees are of exceptional quality with large well developed tops and root systems. Plant Plum trees 20 feet apart each way.

Prices of Green-Grown Plum Trees

Size	Height	Each	10	100
Large	5 to 7 ft.	\$0.75	\$6.00	\$40.00
Medium	4 to 5 ft.	.65	5.00	30.00

Plum trees grow rapidly and we therefore do not offer small or Parcel Post sizes for sale.

Rates—Less than ten at each rate. Ten to fifty at ten rates. Fifty or more at hundred rates.

Bradshaw (Purple). Fruit large, dark reddish purple. Flesh yellow, juicy and sweet. Trees vigorous and productive. Ripens in August.

Burbank (Red). One of the largest and best. Its yellow flesh is meaty, firm, juicy and sweet. Very productive. Ripens in late August.

Lombard (Purple). Skin dark purplish red. Flesh yellowish, firm and sweet. Extremely hardy. Freestone. Ripens in late August.

Monarch (Purple). Large, rich, purple fruit. Flesh golden yellow, juicy and sweet. Ripens in October.

Shropshire Damson (Purple). Small, purplish black fruit, with golden flesh, juicy and of good quality. Excellent for preserves. Ripens in October.

Yellow Egg (Yellow). Extremely large yellow fruit, with firm, sweet, rather juicy flesh. Agreeably tart and of good quality. Ripens in late August.

York State Prune (Purple). A superior strain of German Prune. Known in some sections as Felleberg or Italian Prune. Fruit large, purplish black, overspread with thick bloom. Flesh yellow, juicy and of best quality. Freestone. Ripens in September.

UNITED STATES DEPARTMENT OF AGRICULTURE ADVISES YOU TO BUY DIRECT FROM NURSERY

This is what they say: "If the farmer makes his purchases direct from the nurseryman, he will save the expense of the agent and is less liable to mistakes and injury that may occur through repeated handling." United States Department of Agriculture, Farmers' Bulletin No. 113.

Digging Trees in Green's Nursery. Plenty of Horse Power Enables Us to Keep the Blades of the Tree Digger Down Deep. This Insures an Abundance of Fibrous Roots. Twenty Horses are Used.

If You Don't Know Us, Ask Your Neighbor—He's Probably a Customer of Green's.

Green's Standard Pears

A Pear Orchard is a Profitable Investment

FRUIT growers and nurserymen from all parts of the country state that we grow the finest pear trees in the world. We appreciate the compliment, but can only say that soil conditions at our nurseries are unusually adapted to pear trees, and they develop wonderfully. The varieties we offer are unquestionably the best and most profitable varieties. Plant standard pear trees 20 feet apart each way.

Prices of All Varieties Except Bosc

Size	Height	Each	10	100
Largest	5 to 7 ft.	\$.85	\$7.50	\$55.00
Medium	4 to 5 ft.	.75	6.50	45.00

We do not offer parcel post size in standard pears.

Rates: Less than 10 at the each rate. Ten to fifty at ten rates. Fifty or more at hundred rates.

Prices of Bosc Standard Pears

Size	Height	Each	10	100

Medium	4 to 5 ft.	.90	8.00	60.00

We do not offer parcel post size in Bosc.

Summer Pears

Bartlett. The most popular pear both for home and market, a leader among canning pears, commands top prices. Should be in every garden and orchard. Large, golden yellow with reddish blush on the sunny side. Flesh tender, melting and juicy, with a delicious, musky flavor. Tree vigorous, an erect grower, bears abundantly. Ripens in Sept. (See illustration.)

Clapp's Favorite. The most productive pear in cultivation. Very good for the home garden and a desirable commercial variety. Large, long, pale lemon color, richly flushed with russet red on the exposed side. Flesh fine grained, juicy, melting and buttery. A good grower and hardy. Ripens in August, about ten days ahead of Bartlett. (See Illustration.)

Wilder Early. One of the very earliest pears, it always finds a ready sale in the market, and is largely grown by commercial orchardists. Of medium size, pale yellow shaded with russet red, flesh melting and delightful, with a small core. The trees are good bearers, bearing annually. Ripens in early August. This variety was introduced by Charles A. Green several years ago.

BARTLETT—Most Popular for Preserving

CLAPP'S FAVORITE—Very Productive

These four choice varieties should be in every home garden. Unsurpassed in flavor and quality

Pears—Continued

Autumn Pears

Anjou (*Buerre d'Anjou*). A large, greenish pear, shaded with russet-crimson. The flesh is buttery and melting, with sprightly, vinous flavor. Trees are vigorous and productive. One of the best varieties for late fall and early winter use. Ripens in October and keeps until mid-winter.

***Bosc** (*Buerre Bosc*). Without a doubt the highest quality and best flavored pear of all. Should be in every home garden. Very large, having a distinct gourd shape—roundish at the blossom end, with a long, thin, tapering neck. Beautiful golden russet color. Flesh fine-grained, juicy and melting, very delicious and highly flavored. In great demand at fancy fruit stores, often selling as high as 10 cents apiece. We grow it as a standard tree only, as it does not do well as a dwarf. The tree is a moderate grower, fairly erect and productive. Ripens here in late September or early October. **Prices of Bosc listed on page 44.**

Duchess (*Duchess d'Angouleme*). This variety does exceptionally well when grown as a dwarf on quince roots, and we advise our customers to plant dwarf trees of Duchess in preference to standard trees. As a dwarf it is an all around, profitable, market variety, very prolific and a dependable cropper. It is an early bearer, often fruiting the season after planting. The fruit is very large, larger on dwarf than on standard trees. The color, when fully ripe, is bright golden yellow, with a blush on one side, and sometimes slightly russeted. Flesh white, juicy, and of good quality. An excellent keeper. On dwarf roots it is an excellent commercial variety. In season here in October.

Seckel. The small size and peculiar, rich, juicy flavor of this variety makes it a most desirable variety for pickling and preserving. It is generally conceded to be the sweetest of all pears and is greatly prized as a dessert fruit to eat fresh out of the hand. Although small in size, it is very attractive in appearance, being of a russet-yellow color, with a bright red cheek. It is very prolific. Every home orchard should have a tree or two of this excellent variety. In season in September and October.

Sheldon. A pear of unusually good quality and high flavor. Large, round, greenish-yellow in color, covered with light russet. It is very juicy, melting and has a tasty flavor. The tree is a fine grower and a good bearer. It is not recommended as a commercial variety as the fruit has a tendency to drop before ready to pick. Grown only as a standard tree, as it does not grow successfully on dwarf roots. In season here in October and November.

Worden Seckel. An improved Seckel. Equal in quality to its famous parent, which it much resembles in flavor. It is fully as luscious, more juicy, and with an aroma equally as rich and inviting. The fruits are beautifully smooth and regular, golden yellow, with a russet-red cheek. Ripens in October and will keep until Christmas.

Winter Pears

Kieffer. A very profitable market variety on account of its great productiveness and its excellent keeping and shipping qualities. While only fair in quality, it is an excellent canner and is in great demand for this purpose. The fruit is large, golden yellow, sometimes tinted with red on the exposed cheek. The trees are strong, vigorous growers and very healthy. Ripens in October and November. Grown only as a standard tree, as it does not do well on dwarf roots.

Lawrence. A long keeping winter pear that should be planted more extensively. The fruit is medium to large, golden yellow, melting and aromatic. The trees are moderate growers but abundant bearers. A profitable market variety. Ripens in November.

SHELDON—Luscious and Juicy

*BOSC—Beats Them All

Dwarf Pear Trees

A Green Specialty

WE were pioneers in the propagation and sale of dwarf fruit trees which are now so popular for fillers in large commercial orchards and for home plantings. Dwarf trees bear at 3 years of age, and the fruit is larger in size and better in flavor, color and size than that of standard varieties. The only feature that is dwarf is their growing habit, seldom attaining a height of over 18 feet, as against 40 feet in standard trees. Plant 10 feet apart each way.

Green's Selected Varieties of Dwarf Pear Trees

Anjou	Duchess	Wilder Early
Bartlett	Lawrence	Worden Seckel
Clapp's Favorite	Seckel	

Prices—Regular 2 Year Size

Size	Height	Each	10	100
Largest	3½ to 4 ft.	75c	\$6.00	\$37.50
Medium	2½ to 3½ ft.	65c	5.00	27.50
Small	2 to 2½ ft.	55c	4.00	22.50

By Parcel Post—2 to 2½ feet, 60c, \$4.25 per 10.

Rates: Less than 10 at the each rate. Ten to fifty at ten rates. Fifty or more at hundred rates.

Dwarf Pear Trees planted 5 feet apart make a fine hedge. Mr. C. A. Green personally introduced the now popular idea, after originating same in his own garden. A pear hedge is a beautiful sight when in flower, besides the value of the fruit.

Green's Nut Trees

Butternut. Valued for its tropical appearance and beautiful wood. Produces large crops of oblong, nutritious nuts. Bears early. **Prices: 5 to 6 feet, \$1.25 each. 6 to 8 feet, \$1.50 each.**

English Filbert (Hazelnut). A low-growing, bushy tree, producing abundant crops of roundish, tender nuts of fine flavor. Will grow in almost any location. Nuts larger and of better quality, than the native American Filbert. **Prices: 3 to 4 feet, 75c each. 4 to 5 feet, \$1.00 each. Special prices on quantity lots.**

Walnuts

Black Walnut. A large tree of majestic form and beautiful foliage. Its wood is exceedingly valuable and in great demand by furniture makers and gunsmiths. Bears large, round nuts of excellent quality. **Prices 4 to 5 feet, 75c each. 5 to 6 feet, \$1.00 each. 6 to 8 feet, \$1.50 each.**

English Walnut. A fine, lofty-growing tree, with handsome, spreading head. Produces large crops of nuts, which are apt to vary in size and quality. We offer a seedling strain grown from nuts secured from a successful grove a few miles from Rochester. **Prices: 2 to 3 feet, \$1.00 each; \$9.00 per 10. 3 to 4 feet, \$1.25 each; \$11.50 per 10. By Parcel Post, 18 to 24 inch, 90c each; \$8.50 per 10, postpaid.**

Japan Walnut (Sieboldi). This is a very hardy, handsome, rapid-growing tree with large leaves. Bears young and abundantly. Nuts resemble butternuts, but smaller, smooth and thinner shell. **Price: 4 to 5 feet, \$1.25 each.**

Mulberries

New American Mulberry. We consider this the best variety of edible mulberry. A vigorous grower and very productive. Very hardy—the best large fruiting variety for Northern sections. Fruit very large, black, sweet, rich and delicious, ripening from June to September. **Price: Strong Trees, 4 to 5 feet high \$1.25 each.**

Russian and Tea's Weeping Mulberry (See page 15).

Apricots

The apricot is a cross between the peach and the plum. In shape and color it resembles the peach, but in texture and smoothness of skin it is more like the plum. Plant 15 feet apart each way.

Superb. Considered by many the best flavored, most productive, hardy apricot yet produced. Fruit medium size, light salmon color. **Price of trees, 4 to 5 feet, \$1.00 each; \$9.00 per 10.**

Royal. A large yellow variety, very delicious. **Prices: 4 to 5 feet, \$1.00 each; \$9.00 per 10.**

Early Golden. Small fruit but very sweet and juicy. **Prices: 4 to 5 feet, \$1.00 each; \$9.00 per 10.**

ENGLISH WALNUT

Stock Received in Splendid Condition

Green's Nursery Company: Yesterday I received the several items that I entrusted to you for shipment. They arrived in splendid condition. First, the shipment showed that the best of care is given to express shipments in your packing department. The roots of the trees and shrubbery were in unusually healthy condition. All this pleases the writer and I thank you for good value received. JAMES H. ACKLEY, c/o Clopin Company, Inc., 365 Mill Street, Poughkeepsie, New York. April 15, 1929

SUPERB APRICOTS

Green's Peaches

A Selected List of Proven Varieties

THE cream of hundreds—all thoroughly tried and tested and found to possess the essential characteristics of good peaches. Our peach trees are all hardy, Northern grown with wonderfully developed tops and root systems. Peaches prefer a good, sandy loam, but will do well on almost any soil except a heavy clay. Plant 16 feet apart each way.

J. H. HALE
Large and Luscious

Elberta (*Yellow, Freestone*). Deservedly Elberta is the peer of all commercial peaches. The two characteristics that enable Elberta to hold first place undisputed are its ability to do well in almost any soil or climate and its fruitfulness. A beautiful, large, golden-yellow peach, with a brilliant red cheek, firm, juicy, rich and sweet. Ripens here early in September.

Crosby (*Yellow, Freestone*). Often called "frostproof" on account of its extreme hardiness. Yellow, blushed with dull red. Apt to run small in size in soils to which it is not perfectly suited. Ripens here in September.

Early Crawford (*Yellow, Freestone*). Unapproached in quality by any other variety except Rochester, its offspring. Fruit very large, golden-yellow, blushed with dark red. Ripens here in late August or early September.

Greensboro (*White, Freestone*). One of the leading white-fleshed peaches, principally because of its great productiveness and early bearing. Skin is creamy-white, blushed and striped with dark red. Ripens here in July.

J. H. Hale (*Yellow, Freestone*). A notable variety of recent introduction, unusually large in size of fruit and very handsome. Largely advertised as a rival to Elberta for commercial honors, but reported in many sections as not prolific enough to compete with that grand old variety. Of a deep golden-yellow color, overlaid with bright carmine. Ripens here in late August or early September.

Late Crawford (*Yellow, Freestone*). Fruit large and very handsome, deep yellow, blushed and splashed with dark red. Ripens here the last of September.

Prices of Green's Peach Trees One Year Old (Except South Haven)

Size	Height	Each	10	100
Largest	4 to 5 ft.	\$0.75	\$6.00	\$35.00
Medium	3 to 4 ft.	.65	5.00	30.00
Smaller	2 to 3 ft.	.55	4.00	25.00

By Parcel Post—2 to 3 feet, 60c each; \$4.25 per 10 postpaid.

Rates—Less than ten at each rates. Ten to fifty at ten rates. Fifty or more at hundred rates.

Belle of Georgia (*White, Freestone*). A creamy white peach, with a beautiful crimson cheek. Ripens here in August.

Carman (*White, Freestone*). The color is a brilliant red, splashed with darker red on a creamy-white background. Very good in quality. Ripens here about the middle of August.

Champion (*White, Freestone*). This is considered the highest in quality of all the white-fleshed peaches. The skin is creamy-white, with splashes of carmine and darker red. Ripens in late August or early September.

Green's Peach Collection

4 Trees, 4 to 5 Feet

1 Early Crawford 1 Rochester
1 Elberta 1 J. H. Hale

Regular Price, \$3.00

Special Collection Price
\$2.50

Note: We can send this collection in 2 to 3 ft. trees, by parcel post for \$1.85 postpaid.

Peaches—Continued

Rochester (*Yellow, Freestone*). A remarkable new, early peach which seems to combine the high quality of the Early Crawford with the productiveness of the Elberta. Not only an ideal home orchard variety, but an excellent commercial peach as well. The fruit is large, yellow mottled with red in color, with thick, firm, juicy flesh, rich and sweet in flavor. Ripens here the middle of August.

South Haven (*Yellow, Freestone*). Fruit large, roundish and uniform in size. Color deep yellow with red cheek. Prolific bearer. Ripens two weeks earlier than Elberta. A promising new variety extremely hardy.

PRICES OF SOUTH HAVEN PEACHES

	Size	Each	10	100
Large	4 to 5	\$0.95	\$8.50	\$60.00
Medium	3 to 4	.85	7.50	50.00
Small	2 to 3	.75	6.50	40.00

Wilma (*Yellow, Freestone*). A new variety of great promise. It is about ten days later than the Elberta. The fruit is large, handsome and of good quality, yellow mottled and blushed with bright, dark red, with tender, juicy flesh of good flavor and quality. Ripens here about the middle of September.

ROCHESTER PEACH

Special Offering of Quinces

All Three Year Trees, Bearing Size

Quinces Pay Good Profits—Take advantage of Green's exceptionally low prices and plant an orchard this spring.

THEY are especially prized for jellies and preserves. They are easy to grow and find a good sale in all local markets.

Orange. We offer only this variety of quince as we consider it by far the best. There are several strains of this old-fashioned Orange Quince and we are propagating from the most desirable strain. The fruit is large, roundish, bright golden yellow, cooks tender and is of excellent flavor. An excellent variety for baking and preserving. The trees are vigorous and productive. Each year more and more are planted for commercial purposes. They are also being extensively planted on the home grounds. Their beautiful and fragrant blossoms are equaled only by the gorgeous and sweet-scented orange blossoms in California. Ripens in late September or early October.

Prices of Green's Orange Quince Trees, Three Years Old

Size	Height	Each	10	100
Largest	4 to 5 ft.	\$0.85	\$6.50	\$45.00
Medium	3 to 4 ft.	.75	5.50	35.00

The Five Most Profitable Varieties of Apples For Commercial Orchards as Recommended by Your State Authorities

Through the fine cooperation of the various State Departments and Colleges of Agriculture, it is possible for us to recommend the most profitable varieties of apples for you to plant in your State. We advise Fruit Growers to limit their plantings to the varieties recommended below.

Connecticut	Duchess	Gravenstein	Wealthy	McIntosh	R. I. Greening
Delaware	Yellow Transparent	Williams Early	Grimes Golden	Jonathan	Delicious
Illinois	Stayman's Winesap	Rome Beauty	Wealthy	Oldenburg	York
Maine	McIntosh	Northern Spy	Gravenstein	Wealthy	Cortland
Maryland	Yellow Transparent	Williams Early	Grimes Golden	Jonathan	Delicious
Massachusetts	McIntosh	Wealthy	Gravenstein	Baldwin	R. I. Greening
Michigan	McIntosh	Northern Spy	Wealthy	Cortland	R. I. Greening
New Hampshire	McIntosh	Baldwin	Gravenstein	Wealthy	Cortland
New Jersey	Baldwin	Banana	McIntosh	Delicious	Yellow Transparent
New York	McIntosh	Cortland	Northern Spy	Baldwin	R. I. Greening
Ohio	Delicious	Yellow Transparent	Oldenburg	Northern Spy	Baldwin
Pennsylvania	McIntosh	Yellow Transparent	Oldenburg	Williams Early	Wealthy
Rhode Island	McIntosh	R. I. Greening	Baldwin	Northern Spy	Delicious
Vermont	McIntosh	Northern Spy	R. I. Greening	Fameuse	Delicious
Virginia	Yellow Transparent	Oldenburg	Grimes Golden	Delicious	Stayman's Winesap
West Virginia	Yellow Transparent	Williams Early	Wealthy	Delicious	Grimes Golden
Wisconsin	McIntosh	Wealthy	Fameuse	N. W. Greening	

This survey was compiled from definite records of bearing orchards, and it is therefore interesting to note the number of states in which the new Cortland is recommended. We feel that this is the greatest endorsement a new variety of apple has ever received, inasmuch as it has only been planted for the past eight or ten years. There is no question that its almost immediate acceptance by Commercial Fruit Growers is due to the fact that it is an improved McIntosh, the most profitable of all apples until the introduction of Cortland.

Cortland has outsold every other variety three to one during the past five years. This is positive proof of its value to commercial growers. The New England Fruit Growers' Association and other authorities who are continually striving to increase the profits of apple growers are advising the planting of Cortland in place of McIn-

tosh in all sections where McIntosh has proven profitable.

The consensus of opinion is that McIntosh has been overplanted and that there will be a surplus of these apples in the near future, which will reduce the market price. This condition will place a premium on Cortland because its season is two weeks later than McIntosh and will come out of storage in fine condition in the spring. Records for years past prove conclusively that apples bring higher prices in the spring than during the fall season.

We, and other authorities, recommend planting Cortland in the following fruit sections: New England, New York, Northern Ohio, Northern Illinois, Michigan, Wisconsin and Pennsylvania.

Green's Small Fruits Department

Cash In on the Huge Profits from Small Fruits

NO class of fruits brings quicker or larger profits. Mr. Charles A. Green developed his nursery business from the profits made on his plantings of small fruits. The easiest way to get the money for the things you want is to plant an assortment of Grapes, Raspberries, Strawberries, Currants, Gooseberries, Blackberries and Asparagus. High prices are paid for fruit from roadside stands or on the market.

Grapes

Every home should have at least four grape vines.
Commercial Vineyards bring big profits.

**Prices of Green's Extra Size
Two Year Old Vines All Varieties
except Caco, Ontario and Concord 25c
each; \$2.25 per 10; \$15.00 per 100.**

**By Parcel Post Postpaid—30c each; \$2.50
per ten.**

**Rates—Less than ten at each rates. Ten
to fifty at ten rates. Fifty or more at
hundred rates.**

Agawam (Red). An excellent keeper that may be kept in common storage until January. Large in both bunches and berries, dull purplish red, rich, sweet and of a decidedly foxy flavor. Vigorous and moderately productive. Ripens here last of September.

Brighton (Red). A very handsome dark red grape of high quality that should be in every home garden. Not generally recommended as a commercial variety, as it will not ship to distant markets. Vigorous, productive and easy to grow. Ripens here about the middle of September.

*Caco (Red)

(See color illustration page 52)

THIS new red grape has the most delicious flavor and is of the highest quality of any grape that we have ever tested. It is one of the earliest grapes in ripening. It has a peculiar characteristic not common to other grapes in that, on account of its being so rich in sugar

and excellent in flavor, it can be eaten with enjoyment fully two weeks in advance of its being fully ripe. In appearance, it is the most beautiful of hardy grapes, wine red in color with abundant bloom. The berries are unusually large, bunches of good size, compact and of good form. The vines are very strong, vigorous growers, hardy, healthy and prolific. This variety is a cross of the two well-known grapes, Catawba and Concord, and is said by expert grape-growers to have all the good qualities of both of these varieties without the defects of either. Ripens here early in September.

**Prices—Extra size, two year old Caco
Grape Vines, 60c each; \$5.00 per 10;
\$40.00 per 100. By Parcel Post postpaid
65c each; \$5.25 per 10.**

Campbell's Early (Black). The characteristics which give this grape its merit are high quality, freedom from foxiness, small seeds, earliness of maturity, large size and attractive appearance both of bunch and berry, hardiness and good keeping qualities. Unfortunately, it is somewhat capricious as to soils and for this reason is not generally rated as a good commercial sort. Ripens here first of September.

Catawba (Red). Of all the grapes grown in New York, Catawba is the best keeper, lasting until March or later. Because of its fine quality, it often brings a higher price than other varieties. Berries and bunches of medium size, dull, purplish red. Vines vigorous, hardy and productive. Ripens here last of September.

Concord (Black). See illustration. Without any question, the leading commercial grape on the continent. No other grape can compete with it in the markets. Blossoms late and, therefore, seldom suffers from spring frosts. Grape juice is made almost entirely of Concord. Vines hardy and healthy. Bunches and berries of fair size, glossy black with abundant bloom, and of good quality. Ripens here middle to last of September. **Prices of Extra Size, Two Year Old Concord Grape Vines, 20c each; \$1.50 per 10; \$12.00 per 100. By Parcel Post, postpaid, 25c each, \$1.75 per ten.**

Delaware (Red). A rich and delicately flavored little red grape that is generally recognized as the standard of quality to judge other grapes by. An exceptionally desirable variety for home gardens on account of its compact habit of growth. Commands a premium in all the markets, often selling for twice the price of Concord. Very hardy. Ripens here about the middle of September.

Diamond (White) (Moore's Diamond). The best white grape for the home garden. Unsurpassed in quality and beauty. Early, hardy, vigorous and productive. A very profitable commercial variety that would take first place among the white grapes as a commercial sort were it not for the fact that Niagara is even more productive. Should be in every home garden collection. Ripens here about the middle of September.

New varieties approved by Green's marked *

Read Details on Page Three

THE CONCORD
GRAPE

Grapes—Continued

Lucile (Red). Recommended where an extra hardy grape is desired, and for localities where the season is short. Its foxy flavor, which condemns it to some, is considered an asset by many who like this foxy taste. Very productive, even more so than Concord. Large in both bunch and berry; very attractive in appearance; quality considered fair to good; ripens here early in September.

Moore Early (Black). The best early black commercial grape, ripening as it does two or three weeks ahead of Concord. Vines vigorous, hardy and moderately productive. Bunch and berry medium to large. Fair to good quality. Ripens here first of September.

Niagara (White). The leading commercial white grape, not as high in quality as Diamond, but more productive. In great demand. Holds the place among white grapes that Concord holds among blacks. Bunches and berries large and handsome, compact, and of good quality. Vines vigorous, hardy and very productive. Ripens with Concord, about the middle of September.

*Ontario Grape

SEE color illustration below. A new, high quality, early white grape originated at the New York State Experiment Station. Large clusters, medium size berries, juicy, tender and sweet. Prolific and a strong grower. Ripens last of August, fully two weeks earlier than Niagara. **Extra size, Two Year Vines, 50c each; \$4.50 per 10. By Parcel Post, Postpaid, 55c each; \$4.75 per 10.**

New varieties approved by Green's marked *

*ONTARIO GRAPE (Half Actual Size)

THE WORDEN GRAPE
Best Black for Home Use

Worden (Black). This is a seedling of the Concord and while its berries and bunches are larger and the fruit is of better quality, it is not as good a keeper and does not ship as well to distant markets. It is a superior variety for home use and for nearby markets, and, on account of its high quality and large size, usually brings a higher price than Concord. For home use we know of no grape of greater value. Fruit ripens one or two weeks earlier than Concord. Ripens here early in September.

60 Pounds of Caco Grapes From One Vine

Green's Nursery Company: Please send us your 1930 catalog. We are well pleased with the nursery stock we got from you. The Caco grape we got from you in 1924 did well here. From one plant we cut 60 pounds of fine grapes last year. It won two first prizes in colored grapes. QUEISNER BROTHERS, R. F. D. No. 2, Montrose, Iowa. January 22, 1929

Handy Helpers for Gardens and Orchards

BLOOMMAID

For Flowers · Shrubs · Vegetables

If you want your flowers to bloom earlier and longer, your shrubs and hedges to be greener, thriftier, we recommend that you use Bloomaid. Brings blooms ten days to two weeks earlier—makes plants double the size of those not treated.

Use it in the vegetable garden, around shrubs and to enrich the soil in window boxes and flower pots.

Fifteen times as rich as manure; does not bring in weed seed or the spores of plant diseases.

Bloomaid Prices

Tablet Form (125 Tablets)	\$.30

5-lb. Container75
25-lb. Bag.....	1.75
100-lb. Bag.....	5.00

Above prices include postage except 25 and 100 lb. bags, which are F.O.B. Rochester.

FARM AND GARDEN RULE BOOK

By L. H. Bailey

This is a practical book pertaining to care and cultivation, easily located rules, receipts, formulae and tables for the use generally of farmers, gardeners, fruit growers, nurserymen, stockmen, dairymen, etc. \$3.00.

THE PRUNING MANUAL

By L. H. Bailey

A knowledge of the practice of pruning is one of the essentials in horticulture. Fundamentals and the Incidentals, covering every phase of the practice. It treats fully of the pruning of trees, bushes, and vines. \$2.50.

SULPHO-TOBACCO SOAP

Sulpho-Tobacco Soap makes a very efficient liquid spray for Aphis—the little green bug often found on rose bushes and other plants, and the Black Aphis on cherry and other fruit trees and plants.

One 8 ounce cake dissolved in four gallons of warm water, when cooled is ready to use for these very common and other sucking insects. Price, postpaid, \$3.50.

One 16 ounce cake making eight gallons of spray. Price, postpaid, \$1.00.

TREE PROTECTORS

The most practical tree protection against mice, rabbits, and other pests is the "Wood Veneer Protector," size, 10 by 20 inches, placed about the trunks of young trees. In lots of 50, \$1.50; or \$2.25 per hundred, f. o. b. Rochester.

PEXTO PRUNING SHEARS

The famous Pexto pruning shears used by nurserymen. Postpaid, only \$2.00.

THE LEVIN PRUNER

One of the easiest cutting pruning shears. Postpaid, \$1.25.

GREEN'S GRAFTING TOOL

A complete tool for grafting, made in one piece of forged steel. Price postpaid, \$1.50.

GREEN'S GRAFTING WAX

In convenient pound packages.

Price, pound package, postpaid, \$1.00.

Price, 5 lbs., postpaid, \$4.00.

DANDY TREE PRUNER

Made of steel, cuts very easy, smooth and fast. It is light, handy and efficient. Fully warranted. Postpaid, \$3.75.

GRAPE AND ROSE SHEARS

This nickel plated tool will pick grapes, roses and other flowers. Clips the fruit or flower stem cleanly and holds it, freeing one hand for holding basket or bouquet. Postpaid, \$1.25.

BERRY CANE HOOK

A new and useful tool for thinning berry bushes and shrubbery. A very handy and practical tool. Length, 30 inches; postpaid, \$1.50.

CHAUTAUQUA
Best for the
Home Garden

Gooseberries

Will Pay You Well

AN exceedingly profitable fruit when properly handled. The market is rarely over supplied, as gooseberries can be gathered and marketed through a very long season. Every home garden should have a dozen or two bushes, as gooseberries are very easy to grow, and the fruit is extremely desirable for cooking and other culinary uses. Plant gooseberries 4 feet apart each way.

Chautauqua. An excellent variety for the home garden. Large, greenish yellow, of excellent quality, sweet and high flavored. Vigorous, upright bushes, hardy and productive. **Medium size, Two Year Old Bushes, 40c each; \$3.50 per 10.**

Downing. The most profitable commercial variety on account of its great productiveness and remarkable shipping qualities. The fruit is pale green, of excellent quality. The bushes are vigorous, upright growers, keeping the fruit free from the ground. Mildew proof. **Extra Size, Two Year Old Bushes, 25c each; \$2.00 per 10; \$15.00 per 100.**

Red Jacket (Josselyn). The best red gooseberry, of high quality, can be planted with entire confidence. Vigorous, upright, hardy and very prolific. **Extra Size. Two Year Old Bushes, 35c each; \$3.00 per 10; \$25.00 per 100.**

Gooseberry bushes can be sent by parcel post, postpaid, for 2c per bush extra.

ELDORADO—A Truly
Delicious Blackberry

Blackberries

Will Make Poor Land Pay Big Profits

Prices of Green's Strong Two-Year Transplanted Bushes

10	100	1000
\$1.25	\$6.00	\$50.00

By parcel post, postpaid, for 2c per bush extra.

Blowers. A large berry of exceptionally good quality, with no perceptible core when fully developed. Ripens in the middle of July, with crops maturing fully in August. One fault with this variety is that it is not an erect grower, which is desirable with blackberries.

Eldorado. We consider this the best variety for home and market use. An early to medium season berry of great merit. The bushes are hardy and very productive. The berries are large, jet black, borne in large clusters and ripen well together. They are sweet and melting, have no hard core and keep for 8 to 10 days after picking without quality impaired.

Snyder. A very popular early variety, possibly the hardiest of all, and very productive. The berries are of medium size, sweet, melting and delicious.

Raspberries

Are First in Commercial Importance
Our Raspberries are all Two-Year Transplanted
Bushes, Ready to Bear

CHARLES A. GREEN was possibly the first raspberry enthusiast to advise his many friends and patrons of the value of the raspberry for the home and commercial growing. The planting of this fruit has brought undeniable pleasure and help to the home maker and surprising profits to the commercial planter. There is a ready demand for raspberries at 20 to 30c per quart. One of our friends reports a crop netting him \$1947 from a two-acre plot—another \$2450 from a three-acre field. And many other reports are on file here of phenomenal profits from this splendid bush fruit. We have just recently plowed up a raspberry field which was set in the spring of 1911. This field bore heavy crops for 16 years and the twelfth crop was the biggest of the sixteen. Raspberries under reasonable conditions may be expected to produce a paying crop for at least 12 years.

Prices of all varieties except Latham and Golden Queen

Strong Two-Year Transplanted Bushes

10	100	1000
\$1.25	\$8.00	\$60.00

Rates—Less than fifty at ten rates. Fifty to 300 at hundred rates. Three hundred or more at thousand rates.

Columbian (Purple). At our nurseries we have found this variety to be the most profitable of all. A strong grower and unexcelled for productiveness. An excellent shipper and in great demand for canning. Very large, dark reddish purple, rich, juicy and delicious. Ripens in mid-season. One of the fields of Columbian, from which our plants were taken, two acres in extent, netted in one season, \$2,700.00. A farmer nearby sold his entire crop of wheat from 40 acres for \$900.00. For quick and continued profit we cannot say enough about this wonderful berry.

Cuthbert (Red). An old favorite, probably the best known of any. Canes tall, vigorous and very productive. Berries large, handsome, rich crimson. A good shipper and of the best quality. Season medium to late.

PLUM FARMER (The Best Black Raspberry)

Green's Raspberry and Blackberry Collection

40 Extra Strong 2 year old bushes

10 Latham 10 Cuthbert
10 Columbian 10 Eldorado (Blackberry)

© P. EX. PR. CO.

COLUMBIAN (Purple) — An exceptionally fine variety that will pay big profits

Raspberries—Continued

***Golden Queen (Yellow)** Most delicious of all golden varieties of raspberries. Tall canes bearing delicious large handsome berries. It is an ideal variety for the home garden. **Prices: Strong 2 year transplanted bushes, \$2.00 per 10; \$10.00 per 100.**

Herbert (Red). This is probably the hardiest red raspberry grown. It originated at Ottawa, Canada, and has stood without injury 40 degrees below zero. The cane of the Herbert is very strong and vigorous, the leaves large and healthy. Fruit oblong, very bright red, and large. It is firm, sweet, juicy and of good flavor. Quality very good. Season begins a few days before Cuthbert. An exceptionally fine variety, both for garden and commercial planting.

*LATHAM RED

(Sometimes called Redpath or Minnesota No. 4)

The Mosaic free variety

The peer of red raspberries. A new variety that has attained commercial rank quickly because of its hardiness, great vigor, productiveness, size of berry, and ability to withstand disease. It is predicted that in a few years ninety per cent of the red raspberries in the United States will be of this variety. Although we have a large supply on hand, according to present indications our stock will be sold out very early, so it would be advisable for you to order at once and avoid disappointment. We heartily recommend this variety.

PRICES: Strong 2 year transplanted bushes, \$1.50 per 10; \$9.00 per 100; \$65.00 per 1000.

Plum Farmer (Black). In our opinion, the best of the black cap varieties. At Green's Fruit Farm it has not been surpassed in size or productiveness by any other black variety. Ripens early and quickly. Berries large, thick meated, firm and of excellent quality. A profitable early market variety. Sells for the highest prices.

*THE NEW LATHAM

How to Plant

PLANT raspberries 4 feet apart in rows which are 6 feet apart. The old wood should be cut out as soon as it has fruited, and with the red varieties, thin out the suckers each spring to 5 or 6 on each hill. Black and purple varieties should be pinched early when the canes are about 2 feet high. We advise all those except experienced commercial growers to plant the two-year old transplanted bushes. Nitrate of Soda will hurry up the growth of the plants, but rich barnyard manure applied annually or semi-annually will keep the plants in vigor.

*GOLDEN QUEEN

Garden Roots

ASPARAGUS

(The Vegetable Aristocrat)

Three and Four - Year Old Roots at Special Low Prices

UNDoubtedly we grow more asparagus than any other nurseryman in the country. Soil conditions at our nurseries are ideal for asparagus culture. Strong root systems and crowns are developed, from which quick results are obtained. Asparagus brings big profits to the commercial grower and much pleasure and profit to the small gardener. Our new low prices on 3 and 4 year old roots, from which large size asparagus tips may be cut one year after planting, are bargains that you should take advantage of. Why wait three years for your asparagus bed to come into bearing? We offer only the two most profitable and popular varieties of proven merit.

Palmetto. Extensively planted both for commercial use and the home garden. A very early, hardy variety, producing large stalks of even, regular size, of excellent quality.

Prices of Palmetto Asparagus

	25	100	1000
Ex. Heavy 3 Yr.....	\$0.75	\$2.00	\$15.00
Ex. Heavy 4 Yr.....	1.00	2.50	18.00

***Washington.** The most popular, new variety ever introduced. Stalks are large, dark green, with heavy purple overtone. Tips are tight and firm and do not open until well out of the ground. Rust-resistant.

Prices of Washington Asparagus

	25	100	1000
Ex. Heavy 3 Yr.....	\$1.00	\$2.50	\$18.00
Ex. Heavy 4 Yr.....	1.50	3.50	20.00

Asparagus is the first of the earliest green vegetables—the most delicious delicacy in vegetables—the most health-giving vegetable of all.

***WASHINGTON ASPARAGUS**

Could Not Be Better Satisfied

On Saturday last, the trees which I ordered were delivered. They were received in perfect condition, excellently packed, roots so well protected they were as fresh as if just dug. The trees which you sent were perfect; in fact, had I made my own selection they could not have been more satisfactory. Several of my friends have seen them and they think the trees wonderful. I wish to thank you for the kind and careful attention you gave my order and can only say, it is equal to my previous experience with you.
ABBIE A. STANERUCK, 654 East Summit Avenue, Roxborough, Phila., Penn.

April 26, 1929

Planting and Care of Asparagus

The best soil for an asparagus bed is a light loam or well-drained muck, but rather heavy soil will produce a paying crop if the top is worked with hoe, rake or harrow in the early spring. In even the smallest garden, a few square feet of ground should be devoted to asparagus. In the family garden, the roots should be set from one to two feet apart in rows three feet apart. They should be placed in furrows six or eight inches deep, but covered with only about two inches of soil at time of planting, the remainder of the trench being filled in by degrees as the plants increase in height.

Asparagus is rightfully called the "vegetable aristocrat." No vegetable that we know of has its rich, refined delicious flavor. You never will really know how delicious this vegetable can be until you go out into your own patch and within a short time after cutting, dish out the long, big stalks of this vegetable delicacy.

Asparagus roots being great feeders, the plants should be top-dressed every spring before they start to grow. The second top-dressing should be done immediately

after the cutting season. You cannot manure too heavily. To keep down weeds a small dressing of salt may be used, since it does not injure the plants. In the fall when the tops are mature, they should be cut, hauled off and burned.

A few years ago asparagus plants were only set out by the dozens or possibly hundreds. Plantings are now being made annually by the tens of thousands. Truck and fruit growers and even farmers now realize that as a market crop fresh cut asparagus is a leader, taking into consideration the first cost of the plants and labor expended. A neighboring farmer assured us that his acre-field of plants has brought him in more clear profit the past three years than any ten acres into farm crops.

We grow asparagus roots by the million. Our soil is especially adapted to producing strong roots—roots so good that one buyer, to whom we delivered 200,000 plants, said that he had bought plants for many years but had never seen plants so good before.

Garden Roots—Continued

RHUBARB

The first thing in the spring to furnish material for pie or sauce. Its health-giving, tonic properties make it invaluable as a spring regulator. Easy to grow. Should be in every home garden. Requires little space and may be planted in most any spot in the garden where other garden material cannot be planted. If planting in rows, place roots three feet apart with rows four feet apart.

Myatt's Linnaeus. The best variety for general use. Stems large, tender and of refined flavor. Yields abundantly. We offer heavy three year roots ready to produce stalks for use the first season. **Prices of Extra Strong, 3 Year Roots: 25c each; \$2.00 per 10; \$15.00 per 100.** By Parcel Post, postpaid, for 3c per root extra.

HORSE RADISH

English or Common. The variety in general use. Very, very hardy and will persist in soil year after year. Does best in deep, rich, cool soil. As high as ten tons have been taken from one acre. Plant in rows three feet apart and one foot apart in each row. **Price of Strong Sets: \$1.00 per 25; \$3.00 per 100; \$25.00 per 1000.**

SAGE

Holt's Mammoth. Forms a dense mass of light green leaves, used extensively for seasoning dressings and sauces. Set plants three feet apart each way. **Prices of Strong, Transplanted Roots: 35c each; \$3.00 per 10; \$20.00 per 100.**

CASH DISCOUNTS FOR EARLY ORDERS (See page 3)

MYATT'S LINNAEUS
RHUBARB

Gladiolus Bulbs

GLADIOLI will add beauty to your flower garden and make glorious bouquets for the living or dining rooms of your home when freshly cut. No flower is more popular for this purpose. Gladiolus bulbs should be planted early in the spring, two to four inches deep and four inches apart. They should be lifted after blooming and stored in a cool, dry place over winter.

Strong Bulbs—15c each; 90c per 10; \$6.00 per 100, postpaid.

America—Flesh pink, faintly tinged with lavender.

Lucette—Ivory white, with lines of faint pink.

1910 Rose—Rose-pink, shading to rose-red.

Cracker Jack—Dark red, throat spotted with yellow and maroon.

Mrs. Francis King—Pure light scarlet.

Mrs. Frank Pendleton, Jr.—Delicate salmon-pink with blood-red throat.

Schwaban—Pure canary yellow, sulphur throat blotched with carmine.

Green's Rainbow Collection of Gladiolus

Twenty Extra Size Bulbs—A Wonderful
Mixture of Colors

ALL FOR SPECIAL PRICE OF

A BUNCH OF GLADIOLUS BLOSSOMS

Currants

Another Green Specialty

UNQUESTIONABLY we raise more currant bushes than any other nursery company. We grow them for fruit extensively in our nurseries and have found that they are one of the most profitable small fruits. Currants are always in demand on the market for making jellies, jams, preserves, tarts, etc. Every home garden should contain a dozen or two bushes. Plant 4 feet apart each way.

Prices of All Varieties Except Perfection

Size	Each	10	100
Extra Size, Three Year Bushes...	\$.30	\$2.00	\$15.00
Extra Size, Two Year Bushes...	.20	1.50	12.00

By Parcel Post, postpaid add 2c per bush extra.

Rates—Less than ten at each rate. Ten to fifty at ten rate. Fifty or more at hundred rate.

DIPLOMA
The largest and most productive currant

Diploma. Received the World's Fair Diploma at the Pan-American Exposition in 1901. The best of all the red varieties. Recommended by the New York Agricultural Station as a variety well worth planting. Fruit very large, light red, sweet and unusually

juicy. The bushes are strong, vigorous growers and exceptionally productive.

Fay's Prolific. Berries are above average in size, of excellent flavor and not very acid. The clusters are long-stemmed, which makes them easy to pick.

Perfection. In color it is a beautiful bright red, the berries averaging larger than most varieties, the

clusters averaging longer, and the size of the berries is maintained to the end of the bunch. It has a rich, mild, sub-acid flavor, with plenty of pulp and few seeds. **Extra Size, Two Year Bushes, 40c each; \$3.50 per 10; \$30.00 per 100.**

Red Cross. A strong growing and exceedingly productive red currant. The clusters are long, with berries of medium size and of bright red color. This variety is unusually sweet for a currant, requiring less sugar in canning than other varieties.

Wilder. This is an excellent variety for the home garden. Few varieties equal it in productiveness and long keeping qualities. Berries are bright red in color, large in size, with good sized clusters.

White Grape. This is the best of all white currants. It is an excellent dessert variety because of its mildly acid flavor and large, handsome clusters of golden green or white berries. It is very prolific.

Strawberries

For the Home Garden or for Commercial Planting

STRAWBERRIES come first among small fruits. If planted for home use, a very small bed will yield a large amount of berries. Commercially, they pay big profits, \$400.00 to \$500.00 per acre being not uncommon. As a matter of fact, a patron wrote us not long ago that his strawberry plants were making for him \$1000.00 per acre. Planted between the rows of trees in a young orchard, they will often pay all expenses of bringing the orchard into profitable fruiting and net a handsome profit besides. All the varieties that we offer are perfect-flowering and do not need another variety planted nearby for cross-pollenization. Plants should be planted immediately upon arrival. Our plants are taken from young beds, fresh dug before shipment; plants are well rooted. (See list of varieties on next page.)

CORSICAN STRAWBERRIES—The Largest and Best Variety Known
(See description on next page)

Strawberries—Continued

June Bearing Varieties

Cooper (*Perfect Flowering*). Mid-season. Plants extra large, strong growers, of a decidedly upright habit of growth, and exceedingly productive. The berries, often referred to as the "biggest berries grown," are of a beautiful bright red color, firm and deliciously sweet in flavor. **Strong Plants, \$1.00 per 25; \$2.50 per 100, postpaid.**

Kellogg's Premier (*Perfect Flowering*). Early. Unquestionably the best extra early variety known. In all soils and climates it will be found producing enormous crops of uniformly large, deep red berries, which have made this variety famous. **Strong Plants, \$1.00 per 25; \$2.50 per 100, postpaid.**

Corsican

The Perfect Strawberry

We consider this the finest June bearing home garden berry. The berries are unusually large, bright red, firm, juicy and of exceedingly high quality and flavor. The plants are exceedingly vigorous and healthy, resisting disease, drought, weeds and even neglect of cultivation. Very productive. Mid-season. Perfect flowering. **Strong Plants, \$1.25 per 25; \$3.00 per 100, postpaid.**

PLANTS ARRIVED IN PERFECT CONDITION

Green's Nursery Company: The Strawberry plants arrived in perfect condition. I planted them immediately and kept them covered and now they are all growing and doing fine. Thank you for your generous measure. CLIFFORD GWYNNE, Knickerbocker Road, Box 671, Closter, New Jersey.

Strawberry
The First
Everbearing
Strawberry
Approved by
Greens

Everbearing Varieties

Everbearing strawberries yield fruit continuously from June until frost. To obtain the largest fruit in the fall keep blossoms picked off until about the first of August.

*Mastodon Everbearing

The Best Everbearing Strawberry Ever Introduced

The introduction of this wonderful variety has caused much interest amongst strawberry growers—and no wonder—the Mastodon outranks all everbearing varieties in plant growth, fruit production and size of berry. One well known grower says, "The berries are of immense size and the crop almost incredible." On our grounds the Mastodon has proven five hundred per cent better than any other everbearing variety. Last season we picked and marketed fruit of the Mastodon from September 1st until well in November. **Strong plants, \$1.50 per 25; \$4.50 per 100, postpaid.**

WHEN you have made your selections from this catalog, please loan it to a friend or neighbor who is also interested in planting this Spring.

GREEN'S NURSERY COMPANY, ROCHESTER, N. Y.

~ Good Will ~

SIXTY per cent of our new business comes to us unsolicited each year. This huge volume of good will business is sent to us by our customers who have recommended Green's Nursery Company to their friends and neighbors.

Inasmuch as it is impossible for us to know just who these customers are who are so graciously fostering the interests of our company, so we wish to take this opportunity of thanking them most heartily for this fine expression of their confidence in us.

We also wish to again thank our many thousands of loyal customers who purchase their growing things from us year after year, and the many new friends who sent their first orders to us in 1929.

It was our earnest endeavor to make our new 1930 catalog the best we have ever issued during the past half century. We hope that its many colored illustrations and planting information will prove helpful to you. If we can assist you in any way in helping you solve your planting problems, please feel perfectly free to write us.

Your attention is particularly called to our new replacement offer which is made for the first time this year. If it were humanly possible for us to guarantee one hundred per cent success in transplanting growing things we would do so, but inasmuch as this is impossible we feel confident that our replacement offer will be enthusiastically accepted by our customers, and hope that you will interpret this new policy as further assurance that we are vitally interested in the success of our customers.
